Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PCCC An Tâm is a Vietnamese industrial-equipment ecommerce website presenting fire-protection pumps, pressure equipment, product listings, technical information, purchasing guidance, and branch contact channels for direct enquiries and orders.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, brand impersonation, malicious behavior, or confirmed harmful reputation signal. The product pages describe a conventional equipment-sales model, including diesel, electric, and petrol pumps, pressure tanks, and booster pumps, with contact-based purchasing rather than investment, cryptocurrency, or unusually high-return offers. The site also has no login form, hidden sensitive form, wallet connection, cloaking, or suspicious script behavior in the observed sessions. This supports an apparently legitimate, low-risk commercial presentation, although the real-world operator identity remains independently unverified.

EVIDENCE

- Product pages and the homepage present industrial pump categories, named products, promotional listings, and cart/contact-based ordering.
- Observed site behavior recorded no login form, hidden forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts.
- The domain was registered on 2016-01-29T02:42:30Z and has an age of 10.56 years.
- Historical records show 62 archive snapshots from 2016 through 2025, covering 10 years tracked.

Regulatory Verification Notes

The site appears to operate as a standard retail supplier rather than a financial or investment service. Its contact and branch information support a coherent commercial presentation, but the supplied pages do not show a company registration number, industry certification, or other formal licensing disclosure; this is a verification gap, not evidence of deception. The available evidence is consistent with an established website, while the connection between the website and a verified real-world legal entity has not been independently established. The domain is registered through Web Commerce Communications Limited dba WebNic.cc.

EVIDENCE

- The contact page and site navigation provide company contact information and multiple branch references.
- The purchasing-guidance and product sections describe ordinary equipment sales and ordering procedures rather than regulated financial activities.
- The supplied site content contains no stated license number, licensing authority, or formal registration disclosure.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant's legal name, business registration, and any fire-protection equipment certifications relevant to the proposed purchase. The purchasing-guidance and checkout paths should be reviewed for delivery terms, warranty coverage, returns, invoicing, and payment-protection provisions. Contact details should also be validated through an independently obtained business directory, manufacturer channel, or offline confirmation rather than relying solely on the website.

EVIDENCE

- The purchasing-guidance page provides the appropriate location for checking ordering, delivery, and payment conditions.
- The product pages identify the equipment and brands against which warranty and authorized-distributor claims can be checked.
- The contact page provides the channels and branch information suitable for independent merchant verification.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate commercial website. No scam or impersonation contradictions were identified. The principal residual uncertainty concerns independent confirmation of the real-world operator, so legitimacy should be described as apparent rather than proven.

Infrastructure Integrity

The site resolves directly to hosting associated with QTSC-AS-VN – Quang Trung Software City Development Company, Vietnam, on AS24085, with no CDN or WAF identified and one likely origin address observed. Transport encryption is provided through a domain-validated certificate; this supports secure transmission but does not independently establish the operator’s identity.

EVIDENCE

- Hosted on AS24085 through QTSC-AS-VN – Quang Trung Software City Development Company, VN.
- TLS certificate issued by YR1, validation level DV, valid to 2026-10-20T02:19:29+00:00.

Closing Assessment

The site is suitable for ordinary commercial evaluation, provided that merchant identity, transaction terms, and payment protections are confirmed independently before material purchases or credential submission.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pcccantam.com.

- The request stayed on pcccantam.com. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications Limited dba WebNic.cc. CLEAR
- DNS for this domain is served by net.vn, across 2 name servers. NOTED
- The registration is paid up to 2027-01-29. NOTED
- The earliest public archive of this site is from 2016-07-17. CLEAR
- It is hosted on QTSC-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pcccantam.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
