

Is pcm.org.in safe? TrustSniffer's low-trust assessment: 41/100

pcm.org.in

Verdict

41

OUT OF 100

LOW TRUST

pcm.org.in is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Parked domain placeholder page provided by Hostinger with promotional links to hosting, VPS, website builder, domain search, and business email services. No login, transactions, or sensitive requests present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://pcm.org.in/>

Registered at  **HOSTINGER**

If this is your domain, you can manage it in your Hostinger account.

What pcm.org.in served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a Hostinger parked-domain placeholder for pcm.org.in rather than an operating commercial or financial service. It presents hosting, VPS, website-builder, domain-search, and business-email promotions, with the apparent purpose of monetizing domain parking and referrals rather than providing a substantive service under its own identity.

Scam/Impersonation Risk

No site-level impersonation, login mechanism, transaction flow, or sensitive-data request was observed on the captured homepage. However, the domain is associated with confirmed blacklist findings and four malicious detections from external reputation services; this is a material contradiction to the otherwise benign presentation of a parked page. Separate reports concerning the hosting IP are attributed to shared Hostinger infrastructure, so they are contextual rather than proof that this specific page generated the reported activity. The resulting posture is unsuitable for credentials, financial interaction, or other sensitive use.

EVIDENCE

- Homepage content is a Hostinger parked-domain page with no login form, payment flow, or sensitive-input form.
- The domain received 4 malicious detections and is present on 2 external blacklist sources.
- Hosting IP 2.57.91.91 has 27 abuse reports, attributed to shared Hostinger infrastructure rather than exclusively to this domain.
- Domain registered 2021-03-11 (~5.45 years old); 18 archive snapshots spanning 2017-12-21 to 2025-03-24, covering 9 years tracked.

Regulatory Verification Notes

The homepage does not identify an operating legal entity, regulated activity, license, or registration number; this is a disclosure gap rather than independent proof of fraud. The available content is consistent with a parked domain and does not substantiate a regulated business model. Operator identity remains unverified, and the domain is registered through Hosting Concepts B.V. dba Openprovider. Transport security is present, but the certificate is domain-validated only and does not establish the identity of the operator. A WikiFX-like broker dataset returned no matching broker record; this is contextual reputational information, not a licensing determination.

EVIDENCE

- Homepage title and body identify the page as a parked domain on the Hostinger DNS system.
- No legal, licensing, or corporate-identity disclosure appears in the supplied homepage content.
- Domain registrar: Hosting Concepts B.V. dba Openprovider.
- Served from AS47583 (AS-HOSTINGER — Hostinger International Limited, CY); TLS certificate issued by YE1 (DV), valid to 2026-09-07, with 16 days remaining.

What to Verify Next

Before any sensitive interaction, independently establish which entity controls the domain and whether that entity has a legitimate reason to use it. If the domain is presented elsewhere as a financial, trading, investment, or regulated service, confirm the claimed operator and authorization directly through the relevant official registry and an independently sourced contact channel. The confirmed external reputation contradiction should also be reviewed by the organization's security or fraud team before the domain is allowlisted or incorporated into business workflows.

EVIDENCE

- The homepage provides promotional parking content rather than an identifiable operating-service profile.
- No licensing or operator documentation is supplied in the captured site content.
- The page has no sensitive-input forms, so there is no operational basis for treating it as an approved login or payment endpoint.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site appears to be a parked informational page, but confirmed external reputation contradictions prevent its legitimacy from being endorsed or its operator identity from being treated as established.

Infrastructure Integrity

The domain resolves directly to Hostinger infrastructure, with no detected CDN or WAF edge layer and one likely origin address. The identifiable hosting environment and valid TLS provide basic technical assurance of service delivery, but they do not offset the domain-level reputation concerns or prove ownership.

EVIDENCE

- Hosting provider: AS-HOSTINGER — Hostinger International Limited, CY.
- Network ASN: AS47583; registry: RIPE NCC; hosting country: CY.
- Infrastructure assessment identifies 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS validation level: DV; issuer: YE1.

Closing Assessment

The appropriate posture is passive viewing only until the domain’s operator, intended purpose, and external reputation are independently resolved; credentials and financial information should not be submitted.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 27 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 33% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pcm.org.in.

- The request stayed on pcm.org.in. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. dba Openprovider. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-11. NOTED
- The earliest public archive of this site is from 2017-12-21. CLEAR
- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pcm.org.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
