Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is an established Brazilian direct-to-consumer fashion storefront offering anatomical sandals, sunglasses, bags, socks, and accessory kits, with prices in Brazilian reais, instalment payment options, promotions, nationwide delivery benefits, returns information, customer support, and account-based checkout.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam-related conflicts were observed. The homepage presents a coherent retail proposition: named products carry ordinary merchandise prices and discount information, while the navigation consistently supports shopping, order tracking, account access, delivery, returns, and product care. Its multi-year domain registration, clean external threat reputation, benign interaction testing, and consistent social-media links provide convergent evidence that this is the genuine storefront it presents itself to be.

- The domain registration record identifies Alisson Maurilio as the owner and shows registration in 2020 (~5.75 years old), with expiry on 2026-11-01.
- The homepage displays anatomical sandals and related fashion goods with prices in reais, instalment terms, promotional discounts, and a conventional cart and checkout journey.
- The observed homepage contained no hidden forms, external password forms, suspicious scripts, clipboard manipulation, cloaking, or wallet-related behavior across 2 successful interaction runs.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or impersonation finding; the homepage links consistently to Facebook, Instagram, and TikTok.

Regulatory Verification Notes

The site operates as a conventional merchandise retailer rather than a financial, investment, brokerage, or crypto service, so the absence of a financial-services licence is not adverse in this context. The homepage reportedly provides Brazilian business identification and exposes privacy, delivery, returns, contact, and cashback pages, creating a suitable consumer-commerce disclosure framework. No conflicting legal-entity names are present in the supplied evidence, and no third-party broker profile was matched. The only minor presentation limitations are the absence of a meta description and structured page markup; these concern search and publishing quality, not legitimacy.

- The homepage identifies a Brazilian retail business and provides links to “Política de Privacidade,” “Envio e Entrega,” “Trocas e Devoluções,” “Contato,” and “Sobre Nós.”

- The homepage describes free delivery throughout Brazil, purchase-related gifts, a first-purchase discount, and instalment pricing of up to 12 payments.
- The site's transport encryption uses a valid DV TLS certificate issued by YE1, valid to 2026-10-27.
- The hosting artifact is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).

What to Verify Next

Before a material purchase, the prospective customer may confirm that the legal identity shown during checkout matches the business identification published on the site, review the delivery and return terms for the selected item, and retain the order confirmation and applicable promotional conditions. The official contact channel and linked social profiles can also be confirmed independently if post-sale assistance is important.

- The homepage provides dedicated order-tracking, delivery, returns, contact, privacy, and company-information routes for pre-purchase review.
- The cart states that coupon entry occurs at the next checkout stage, making the final order summary the appropriate place to confirm discounts and total charges.
- The homepage advertises product-specific regular and promotional prices, instalment amounts, free shipping, and purchase-threshold benefits that should be reconciled with the final checkout record.

Summary Verdict

The website is legitimate, established, and trustworthy, with a consistent commercial identity and no observed contradictory risk signals. The convergence of mature provenance, coherent retail content, clean reputation evidence, ordinary transaction mechanics, and benign tested behavior supports normal interaction, including account login and standard purchases.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure. The single observed address, 23.227.38.32, was a Cloudflare edge server; this arrangement reduces direct exposure of the underlying server and is a mitigating security control, although infrastructure protection alone does not establish business legitimacy.

Closing Assessment

Normal browsing, account use, and standard retail transactions are appropriate, subject to the customary review of checkout totals, fulfilment terms, and transaction records.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [pedealgodao.com.br](#).

- The request stayed on [pedealgodao.com.br](#). It was not redirected to another domain. CLEAR
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. NOTED
- The registration is paid up to 2026-11-01. NOTED
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [pedealgodao.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
