

Is pepzop.com a scam? TrustSniffer's high-risk assessment: 0/100

pepzop.com

Verdict

0

OUT OF 100

CRITICAL RISK

pepzop.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Pepzop is a Coimbatore-based B2B wholesale supplier of cleaning and housekeeping supplies offering product catalogs, bulk-order pricing tiers, contact info, and a wholesale application form. The site provides phone numbers, email, a physical address, and policy pages (privacy, shipping, returns).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://pepzop.com/

What pepzop.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Pepzop presents itself as a Coimbatore-based B2B wholesale supplier of cleaning and housekeeping materials, offering product catalogs, bulk-order pricing, delivery services, wholesale partnerships, and a wholesale application process for businesses such as hotels, hospitals, and facility managers.

Scam/Impersonation Risk

The website's visible content resembles a conventional small-business ecommerce operation and does not present a login page, credential-harvesting form, or obvious brand impersonation. Its homepage promotes cleaning chemicals, mops and brooms, cloths and wipers, PPE and safety gear, and wringer trolleys, while also claiming service to "Fortune 500 companies," "hundreds of satisfied customers," and a 4.9/5 satisfaction rating. Those claims are not independently substantiated in the supplied evidence. More importantly, the domain has a confirmed blacklist status and multiple external malicious detections, creating a material risk for sensitive interaction despite the benign appearance of the page. Abuse reports associated with the observed IP are attributed to shared CDN infrastructure, so they are not treated as direct proof that the site itself generated those

reports; the confirmed blacklist and domain-level malicious detections nevertheless remain decisive. No identity contradiction, phishing finding, or brand-impersonation finding was observed in the page content.

EVIDENCE

- The homepage presents the wholesale cleaning-supply catalog, business-use descriptions, customer-volume claims, and a wholesale lead form.
- External reputation telemetry recorded 14 malicious detections and 1 suspicious detection, with a confirmed blacklist status.
- The observed IP carried 49 abuse reports, explicitly attributed to shared infrastructure rather than directly to the website operator.

Regulatory Verification Notes

The contact, privacy, shipping, and returns pages provide the structure expected of a trading website, including a Coimbatore location and published contact channels. However, the available evidence does not independently verify the real-world operator behind the Pepzop name, and the site does not claim a regulatory license or provide a license number. This is a verification gap rather than standalone proof of fraud. The domain is registered through GoDaddy.com, LLC, and the site uses a valid domain-validated TLS certificate issued by WE1; these are infrastructure and registration facts that support technical continuity but do not establish legal identity, product quality, or regulatory authorization.

EVIDENCE

- The contact and policy pages provide a physical location, telephone contact details, privacy terms, shipping terms, and returns terms.
- The domain was registered on 2021-09-23 and is 4.91 years old; the registrar is GoDaddy.com, LLC.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid until 2026-11-15.

What to Verify Next

Before any sensitive engagement, an independent party should confirm the operating company through the relevant Indian corporate or business registry and match that entity to the physical location and contractual documents. Any registration, tax, or sector authorization relevant to the proposed supply arrangement should be checked directly with the issuing authority rather than relying on the website. Payment arrangements should be assessed for buyer protection, and the shipping, returns, and order terms should be validated through independently confirmed contact channels. The external threat status should also be re-evaluated before the domain is permitted in enterprise environments.

EVIDENCE

- The about, contact, and policy pages are the appropriate locations for matching the claimed business identity and commercial terms.
- The wholesale application is a lead-contact form rather than a password or credential form, but it still creates a business-information submission point.
- The reputation findings are sufficiently adverse that independent clearance is required before sensitive or financial interaction.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site has a plausible commercial presentation, but that presentation is outweighed by confirmed external threat detections and the absence of independently verified operator identity.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the observed address is an edge address rather than an exposed origin; this provides a mitigating layer against direct origin exposure but is not evidence of legitimacy.

EVIDENCE

- Served through AS13335, CLOUDFLARENET — Cloudflare, Inc., US; observed edge IP: 185.158.133.1.

Closing Assessment

Enterprise systems should restrict the site to passive viewing only until the confirmed threat findings are independently resolved and the operator, commercial terms, and payment arrangements have been validated through trusted channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 49 reports on hosting IP 185.158.133.1 (Internet Utilities Europe and Asia Limited, Content Delivery Network), 45% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pepzop.com.

- The request stayed on pepzop.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-23. NOTED
- The earliest public archive of this site is from 2016-04-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pepzop.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
