

Is perfil.ink a scam? TrustSniffer's high-risk assessment: 0/100

perfil.ink

Verdict

0

OUT OF 100

CRITICAL RISK

perfil.ink shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

ServeDigital is a biolink and URL-shortening SaaS product page describing features (bio pages, short links, analytics, API), showing freemium pricing tiers and developer integration examples. No obvious credential-harvesting or payment-to-wallet behavior detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	16 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	5.3 years old Registered history	CLEAR
Web archive	Archived since 2021 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

<https://perfil.ink/en/>

What perfil.ink served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents ServeDigital as an all-in-one social-link and content-sharing SaaS platform, with an apparent freemium business model supported by paid feature upgrades for creators, marketers, and developers.

Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture**. External security intelligence records a confirmed blacklist status and multiple malicious detections, including flags from Fortinet and Sophos. This conflicts materially with the otherwise professional landing-page presentation. The homepage advertises bio pages, URL shortening, advanced URL cloaking, analytics, file links, vCards, event links, and developer tools; although the observed page contained no credential-harvesting form, wallet connection, or suspicious external submission behavior, those capabilities could support redirection or content-abuse activity if the service or account were compromised. The real-world operator identity is not independently verified, so the polished presentation cannot be treated as proof of legitimacy.

EVIDENCE

- External reputation telemetry records 16 malicious detections, with Fortinet and Sophos among the flagged vendors; a confirmed external blacklist status is also recorded.
- Domain registration telemetry records creation on 2021-05-23 at 03:25:38 UTC, with an age of 5.25 years.
- Archive telemetry records 0 snapshots, with first seen on 2021-12-16 at 18:44:19 UTC, last seen on 2025-11-11 at 08:14:44 UTC, and 5 years tracked.
- The homepage contains no login form, hidden form, wallet-provider detection, or external password submission in the observed interaction.

Regulatory Verification Notes

The available material describes a commercial SaaS service rather than a regulated financial product. No licensing claim or license number is presented in the supplied site content; this is a disclosure and verification gap, not by itself evidence of fraud. The available evidence does not independently connect the ServeDigital presentation to a verified legal entity, and the external security findings should be treated as a security concern rather than a licensing determination.

EVIDENCE

- The homepage is categorized as a product landing page and presents freemium pricing, paid feature upgrades, analytics, and developer integration functionality.
- The site's transport encryption uses a DV certificate issued by YR1, valid until 2026-09-07T07:47:50+00:00.
- Hosting telemetry identifies AS47583, AS-HOSTINGER – Hostinger International Limited, CY.
- No license authority or license number is supplied in the available business-model and page-disclosure records.

What to Verify Next

Before any sensitive interaction, an organization should independently establish the operating entity, confirm that the published terms, privacy notice, and payment arrangements identify the same entity, and determine whether any jurisdiction-specific registration or authorization is required for the offered service. Contact channels should be confirmed through an independently sourced route rather than relying solely on the website. Security teams should also obtain a current malware and reputation assessment for the exact domain and any shortened-link destinations before allowing organizational use.

EVIDENCE

- The homepage states that the service supports custom domains, URL targeting, expiration controls, and advanced URL cloaking, making destination validation relevant to enterprise use.
- The available page analysis recorded no obvious credential-harvesting or payment-to-wallet behavior, but this observation does not validate future account or destination behavior.
- Identity verification is recorded as unverified, with no independent identity signals supplied.

Summary Verdict

The overall posture is critical, with sensitive interaction risk taking precedence over the site's coherent product presentation. The available evidence is insufficient to treat the service as safe for authentication, credential handling, or financial activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed address is a CDN edge address rather than an independently visible origin. This provides a mitigating layer against direct infrastructure exposure, but it does not establish legitimacy and may limit independent verification of hosting changes or rapid content replacement.

Closing Assessment

Prospective users should restrict activity to non-sensitive review and refrain from login, credential submission, or financial transactions unless independent validation resolves the security concerns.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of perfil.ink.

- The request stayed on perfil.ink. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-23. NOTED
- The earliest public archive of this site is from 2021-12-16. CLEAR
- It is hosted on AS-HOSTINGER, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about perfil.ink at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
