What perita.com.sg served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Perita Electrical Engineering is a corporate website for an electrical contracting business, presenting design, installation, maintenance, licensing-related services, project portfolios, career information, and contact details for residential, commercial, industrial, and public-sector clients. Its apparent business model is contract-based electrical engineering and maintenance services rather than consumer financial solicitation.

Scam/Impersonation Risk

No scam, phishing, impersonation, or conflicting-identity indicators were observed across the available site content and technical behavior. The homepage and service pages describe a coherent electrical-engineering business, with no login form, sensitive-data form, wallet activity, suspicious scripts, or external posting behavior detected. One isolated external reputation result was recorded, but it was not corroborated by broader blacklist or phishing indicators and is therefore treated as an unconfirmed reputational signal rather than evidence of a contradiction. The site's long-running registration and sustained archival presence further support continuity rather than apparent repurposing.

EVIDENCE

- The homepage identifies Perita Electrical Engineering and describes electrical-system design, installation, maintenance, and licensing-related services.
- Browser behavior recorded 0 external XHR requests, 0 wallet-connect runs, 0 hidden forms, 0 password-external forms, and a cloaking classification of “none.”
- Domain registration: 2008-07-29T09:25:57Z; age 18.07 years; expiry 2027-07-29T09:25:57Z.
- Web archives contain 552 snapshots spanning 2010-08-18T08:20:21Z to 2026-02-04T18:39:57Z, covering 17 years.

Regulatory Verification Notes

The site presents itself as a service contractor and includes About Us, Services, Portfolio, Contact, and Career pages, but the supplied content does not independently verify the real-world operator identity. The homepage refers to “Licensing” as part of its service offering; it does not provide a separately verified operating licence, licence number, or regulator confirmation in the available evidence. This is a transparency item for ordinary business due diligence, not an indication of scam or impersonation. No broker-dataset match was identified, and the overall content assessment found no financial solicitation or material fraud signal.

EVIDENCE

- The homepage and service navigation identify a corporate electrical-engineering business serving residential, industrial, commercial, and public-service clients.
- The contact page is described as providing a physical address, telephone number, and business email.
- Hosted on AS38532, EXABYTES-AS-AP — Exabytes Network (Singapore) Pte. Ltd., SG; hosting provider recorded as Web Commerce Communications (S) Pte Ltd.
- TLS certificate: issuer YR1; validation level DV; valid to 2026-10-23T01:47:09+00:00.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the contracting entity and contact details through an official business registry or an offline channel, and should obtain any licence or permit information relevant to the proposed electrical work from the appropriate authority. For commercial engagement, the contracting party should also confirm written scope, insurance, warranty, invoicing, and dispute provisions before authorising work.

EVIDENCE

- The About Us page and Contact page provide the principal locations for cross-checking the business identity.
- The Services and Licensing-related content identifies the areas for which any applicable permits or professional authorisations should be confirmed.
- The Portfolio page provides project-context material that can be compared with independently obtained references or contract documentation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. The site’s operator identity remains independently unverified, so the trust conclusion should be understood as evidence-consistent rather than proof of the real-world entity.

Infrastructure Integrity

The site resolves through a direct hosting arrangement without a detected CDN or WAF layer, and no origin-candidate or edge-IP anomaly was identified. This infrastructure posture provides less specialised perimeter protection than a CDN-backed deployment, but the observed hosting environment itself does not create a material adverse finding in the context of the overall assessment.

EVIDENCE

- Infrastructure resolution status: resolved; unique IP count 1; edge IP count 0; likely origin IP count 0.
- No CDN or WAF vendor was detected.
- The resolved hosting arrangement is associated with Singapore.

Closing Assessment

Normal business browsing is proportionate, while independent entity, licensing, contractual, and payment-protection checks should be completed before entering credentials, making payments, or committing to a material commercial engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of perita.com.sg.

- The request stayed on perita.com.sg. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications (S) Pte Ltd. CLEAR
- DNS for this domain is served by sgcloudhosting.cloud, across 2 name servers. NOTED
- The registration is paid up to 2027-07-29. NOTED
- The earliest public archive of this site is from 2010-08-18. CLEAR

- It is hosted on EXABYTES-AS-AP, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about perita.com.sg at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
