- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Persian Media is a Persian-language business-services website offering domain registration, Iranian and US web hosting, SSL certificates, website design, SEO, content production, technical support, migration, and business website solutions.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or malicious reputation findings were observed. The homepage presents a coherent corporate web-services model, and behavioral inspection found no login form, hidden sensitive form, wallet interaction, clipboard manipulation, cloaking, or suspicious script activity. The domain also shows sustained historical continuity consistent with an established service business.

- Archive history: 106 snapshots spanning 2013–2026, covering 14 tracked years.
- Homepage: identifies Persian Media's web-services business, support offering, portfolio, and service categories without deceptive financial or credential-harvesting content.
- Behavioral inspection: two successful runs, with no hidden forms, external password forms, wallet activity, or cloaking detected.

Regulatory Verification Notes

The site's about content states that the business began formally and joined Iran's Computer Guild Organization and the country's High Council of Informatics. No specific license number or independently verified regulatory authorization was identified in the reviewed content; this is a transparency item for ordinary business verification, not evidence of impersonation or fraud. External reputation checks were clean, and no broker-related match was identified.

- Domain registration: registered 2013, approximately 13.12 years old, through Hosting Concepts B.V. d/b/a Registrar.eu.
- Hosting infrastructure: served from AS58262, Nrp-Network - Negah Roshan Pars Company (PJS), Iran.
- Transport encryption: TLS certificate issued by E7, domain-validated (DV), valid to 2026-08-10T06:32:26+00:00.
- About page: states formal establishment and professional-sector affiliations.

What to Verify Next

For a prospective commercial engagement, confirm any applicable business registration or service authorization through the relevant Iranian registry, and validate billing, refund, and support arrangements against the site's published service documentation. Official contact channels should also be confirmed through an independent business record before material procurement commitments.

- About and services pages: provide the business identity, service scope, support claims, and stated professional affiliations.
- Product and service pages: describe hosting, domain, SSL, design, SEO, and content-production offerings.
- Site content: references refund policy, support access, and portfolio work.

Summary Verdict

Persian Media is a legitimate, established, high-trust corporate web-services website with a coherent business purpose and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct exposure and common web attacks. The observed address is an edge address rather than an identified origin server, so the protective configuration supports infrastructure resilience without independently proving legitimacy.

Closing Assessment

Normal account login, service use, and commercial engagement are appropriate, subject to ordinary procurement and payment controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about persianmedia.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
