

Is pescoautomacao.com.br legit? TrustSniffer's high-trust assessment: 100/100

pescoautomacao.com.br

Verdict

100

OUT OF 100

HIGH TRUST

pescoautomacao.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for Pesco Automação & Controle (industrial automation). Describes services, certifications/norms, product offerings (electrical panels, control systems), contact information and a contact form. Social links and reCAPTCHA present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What pescoautomacao.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Pesco Automação & Controle is a corporate B2B industrial-automation website presenting electrical-panel manufacturing, electrical and automation projects, industrial networks, control systems, installations, applicable certifications and norms, and a contact channel for requesting quotations and services.

Scam/Impersonation Risk

No contradictions were observed. The site's business model is coherent with a conventional industrial-services provider: the "Quem Somos," "Tecnologias," "Produtos e Serviços," and "Contato" pages describe engineering and installation work rather than investment, cryptocurrency, gambling, credential-harvesting, or other abuse-prone mechanisms. The site has no login form, hidden form, sensitive form, wallet-connect function, or detected brand-impersonation indicator. Available external checks found no malicious or blacklist indicator, although reputation coverage was partial. The domain is associated in the registration record with Pesco Automação e Controle Ltda.; this supports, but does not independently prove, the real-world operator identity.

EVIDENCE

- The homepage and “Produtos e Serviços” page describe industrial automation, electrical panels, electrical projects, installations, industrial networks, and quotation requests; no fraud indicators were reported.
- The contact page contains one contact form without a sensitive-field classification or untrusted submission destination.
- The registration record shows creation on 2013-09-11 and an age of 12.95 years.
- Historical analysis records 24 archive snapshots across 2018–2025, with 8 years tracked and no suspicious repurposing or semantic category drift.

Regulatory Verification Notes

The website presents itself as a corporate industrial contractor and describes certifications and norms, but the supplied pages do not provide a license number or regulator attribution. For this type of B2B engineering service, that is a disclosure and verification item rather than evidence of a scam. The available evidence is consistent with an established, apparently legitimate business website; however, the operator's real-world identity remains likely rather than independently verified. Social links to LinkedIn, Instagram, Facebook, and WhatsApp provide supporting continuity signals, while no separate third-party regulatory status was established.

EVIDENCE

- The “Quem Somos,” “Tecnologias,” and “Produtos e Serviços” pages identify the business as Pesco Automação & Controle and describe its industrial-automation activities.
- The contact page provides direct contact and quotation functionality, including a contact form and linked social/contact channels.
- The site's hosting resolves to AS31898, ORACLE-BMC-31898 / Oracle Corporation, US.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-30.

What to Verify Next

Before a contractual or payment commitment, an enterprise counterparty should independently confirm the legal entity and applicable engineering or procurement credentials through the relevant Brazilian corporate and professional registries. The stated certifications and norms should be matched to current certificates or project documentation, and commercial terms should be confirmed through an independently validated company contact channel. Any payment process should use documented invoicing, clear contractual scope, and available payment protections.

EVIDENCE

- The “Quem Somos” and “Tecnologias” pages provide the stated business identity, capabilities, certifications, and norms for independent confirmation.
- The “Contato” page supports quotation requests but does not itself establish regulatory registration or licensing.
- The site's social links and published contact routes provide channels that can be cross-checked against independently sourced company records.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The classification is strong, while independent confirmation of the real-world operator remains appropriate before material commercial or credential-related interaction.

Infrastructure Integrity

The site is hosted on Oracle Corporation infrastructure under AS31898 in the United States. No CDN, WAF, edge-IP layer, or origin-candidate separation was identified; the direct hosting posture is therefore primarily an infrastructure characteristic rather than a legitimacy signal. Transport encryption is provided by the identified DV TLS certificate.

Closing Assessment

Normal browsing and business inquiry are proportionate; before credentials, contractual commitments, or payments are exchanged, ordinary independent merchant-identity, service-term, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pescoautomacao.com.br.

- The request stayed on pescoautomacao.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by com.br, across 2 name servers. NOTED
- The registration is paid up to 2029-09-11. CLEAR
- The earliest public archive of this site is from 2018-06-22. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pescoautomacao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
