Key findings

- Automated classification: Not Scam.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is a Chilean e-commerce store for pet food, medicines, accessories, habitats, and related supplies, presenting a priced product catalogue, discounts, nationwide delivery, store pickup, shopping-cart functionality, customer reviews, and ordinary retail purchasing under the stated business identity SOCIEDAD COMERCIAL PETHOME SPA.

Scam/Impersonation Risk

No contradictory identity, phishing, impersonation, or malicious-redirection signals were observed. The homepage presents a coherent retail proposition supported by visible inventory, pricing, fulfilment options, and established social channels. Interactive testing found no credential-harvesting form, concealed form, wallet interaction, clipboard manipulation, cloaking, or suspicious script behavior. External reputation evidence was likewise clean, supporting the assessment that this is a legitimate commercial website rather than an imitation storefront.

- The homepage consistently identifies PetHome as a Chilean pet-supply retailer and presents priced products, cart actions, shipping, pickup, reviews, and seasonal offers.
- The homepage contains two newsletter-subscription forms; neither was classified as sensitive or directed to an untrusted destination.
- Behavioral examination completed 2 of 2 runs successfully and detected 0 hidden forms, 0 external password forms, 0 suspicious inline scripts, and no cloaking.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing, impersonation, or confirmed threat-list finding; the domain is ranked 832,688 in the global traffic dataset.

Regulatory Verification Notes

The homepage states the operating identity as SOCIEDAD COMERCIAL PETHOME SPA, and no competing legal-entity name appears in the supplied page evidence. The business model is conventional consumer retail rather than an inherently regulated financial or investment service. No license claim or regulator reference is presented in the available homepage content; this is best treated as a scope limitation for regulated products—particularly any pet medicines—rather than as evidence of deception.

- The homepage attributes the retail operation to SOCIEDAD COMERCIAL PETHOME SPA and provides Chile-focused delivery and store-pickup arrangements.
- The homepage catalogue includes pet medicines, antiparasitic products, health products, and supplements alongside food and accessories.
- The site's transport encryption uses a DV TLS certificate issued by YE2, valid to 2026-10-04.

- The available third-party broker dataset contains no matched broker profile, which is consistent with the site’s non-financial retail model and is not a licensing determination.

What to Verify Next

For enhanced due diligence, the stated company name should be matched against the relevant Chilean corporate record, while any transaction involving veterinary medicines should be checked against applicable product, seller, and fulfilment requirements. Independent confirmation of official contact and pickup channels would provide additional assurance for unusually large or business-critical orders.

- The corporate name required for an independent registry comparison is displayed on the homepage.
- The homepage’s product categories provide the basis for identifying whether a selected medicine requires additional seller or product authorization.
- The homepage publishes telephone, email, and social-media contact routes that can be independently cross-checked.
- The site offers both delivery and store pickup, allowing fulfilment arrangements to be confirmed before a material purchase.

Summary Verdict

The website is legitimate, established, and trustworthy, with mutually consistent commercial content, identity presentation, reputation evidence, and observed behavior. No contradictions were identified, and normal interaction—including account login, routine account activity, and standard purchases—is appropriate.

Infrastructure Integrity

The site is served through Cloudflare’s CDN/WAF, and all observed addresses were edge systems rather than exposed origin infrastructure. This arrangement reduces direct origin exposure and provides standard traffic-protection benefits, although protective hosting alone is not proof of business legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc.).
- Six observed addresses were classified as CDN edge addresses, with no origin candidate identified.
- The confirmed server endpoint was 23.227.38.65 in Canada; the network is registered through ARIN.

Closing Assessment

Prospective customers may use the site normally, applying standard purchase controls such as confirming order details, retaining receipts, and using an appropriately protected payment method.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pethome.cl.

- The request stayed on pethome.cl. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pethome.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
