Full analysis

Overview

Pethouse.ua is an established Ukrainian online pet retailer presenting food, veterinary medicines, accessories, grooming products, discounts, delivery information, customer reviews, and support services through a conventional direct-to-consumer ecommerce model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent pet-retail identity, detailed product categories, pricing-oriented commerce, customer reviews, delivery information, policies, and conventional account access, with no detected phishing, brand impersonation, malicious content, or crypto-related activity. External reputation checks were clean, supporting the conclusion that the site is legitimate and appropriate for normal interaction, including login and standard account use.

EVIDENCE

- Homepage content identifies Pethouse.ua as a pet store offering food, veterinary products, accessories, grooming, and related goods.
- The homepage provides product navigation, discounts, reviews, delivery information, policies, and customer-support functionality.
- Registered 2010-07-06 (~16.08 years old); historical coverage includes 228 archive snapshots spanning 2010–2022 across 13 years.

Regulatory Verification Notes

The site presents a conventional retail business rather than a regulated financial service, and the supplied pages contain no stated regulatory license claim. This is a limited disclosure point for any jurisdiction-specific retail or veterinary-product requirements, not an indication of deception. The domain is registered through TOB "ХОСТЛАБ"; transport security is provided by a valid certificate, while the independent reputation and traffic signals are consistent with an established operating website.

EVIDENCE

- Domain registrar: TOB "XOCT/IAБ"; expiration date: 2027-07-06.
- Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate issued by WE1, validation level DV, valid to 2026-10-26.
- The domain is ranked 154585 and is within the global top 1 million.

What to Verify Next

For regulated procurement or high-value commercial engagement, confirm any applicable Ukrainian retail, veterinary-product, consumer-protection, and tax requirements through the relevant official registers, and independently validate delivery, returns, and support procedures before relying on them operationally.

EVIDENCE

- The homepage publishes delivery information and customer-support contacts.
- The site exposes policies and conventional ecommerce account flows.
- No license number or licensing authority is stated in the supplied business-profile evidence.

Summary Verdict

Pethouse.ua presents as a legitimate, established, trustworthy ecommerce website with a coherent identity, sustained operating history, clean reputation, and no observed contradiction or impersonation signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful defensive layer, and all observed addresses were Cloudflare edge servers; the origin server was not observable in this analysis. This mitigates direct origin exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Standard browsing, account access, and ordinary purchases are proportionate to the site's assessed trust posture, with routine confirmation of transaction details appropriate for any commercial engagement.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pethouse.ua at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
