

Is petrabis.com safe? TrustSniffer's low-trust assessment: 25/100

petrabis.com

Verdict

25

OUT OF 100

LOW TRUST

petrabis.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking Polish fuel distribution website for Petrabis Sp. z o.o. Provides product listings, delivery information, contact data, company identifiers and an order/contact form. Content aims to convert visitors into customers for fuel deliveries and retail station visits.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://petrabis.com/>

What petrabis.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Petrabis.com presents itself as a Polish B2B and B2C fuel-distribution business serving companies and private households with heating oil, diesel, gasoline, and B0 diesel, together with delivery services, fuel-station information, contact details, and an on-site order form.

Scam/Impersonation Risk

The principal risk is not the apparent fuel-distribution business model or the visible page content, which contains no stated phishing, impersonation, or other obvious on-page fraud indicators. The decisive concern is that external reputation evidence records multiple malicious detections and a confirmed blacklist status; these signals materially outweigh the site's professional presentation and stable technical behavior. No conflicting legal-entity names or direct brand-impersonation indicators were observed, but the external detections create a substantial risk for credentials, payment details, or other sensitive interactions. The site's apparent legitimacy therefore remains unverified rather than established.

EVIDENCE

- The homepage identifies “Petrabis sp. z o.o.” and presents fuel products, delivery services, company identifiers, and an order/contact form.
- External reputation checks recorded 5 malicious detections and a confirmed blacklist status.
- Historical records in the analysis show 30 archive snapshots spanning 2013–2026, with 14 years tracked; no suspicious repurposing or semantic drift was identified.
- The domain registration record states creation on 2024-10-18 and an age of 1.84 years.

Regulatory Verification Notes

The website provides a commercial identity narrative, including the name Petrabis sp. z o.o., claims of operating since 1999, references to NIP, REGON, and KRS identifiers, and stated cooperation with PKN Orlen and Rafineria Gdańsk. These on-site claims are useful transparency elements but do not independently verify the operator or its authority to conduct fuel sales and delivery. The available material does not establish a verified license or regulatory registration, so licensing and corporate-identity confirmation remain necessary. The absence of a broker-dataset match is only contextual and has no legal or regulatory significance.

EVIDENCE

- The “About” content names Petrabis sp. z o.o. and states that the business has supplied fuel since 1999.
- The site’s content map identifies NIP, REGON, and KRS identifiers on its contact or identity pages.
- The product and service pages describe heating oil, diesel, gasoline, B0 diesel, and delivery to business and private customers.
- The site’s hosting infrastructure is AS16276, OVH - OVH SAS, FR; its TLS certificate is DV-validated, issued by YE2, and valid to 2026-10-05.

What to Verify Next

The stated NIP, REGON, and KRS details should be matched independently against the relevant Polish corporate and sector registers, and any fuel-trading or delivery authorization should be confirmed with the competent authority. The claimed supplier relationships should be verified through independently sourced supplier contact channels rather than relying solely on statements on the site. Before submitting an order or making payment, the commercial terms, delivery arrangements, invoicing entity, and payment-protection options should be confirmed through an independently obtained contact route.

EVIDENCE

- The “Contact” and “Order” pages provide the identity and transaction details requiring independent confirmation.
- The “About” and offer pages make the operating-history and supplier-cooperation claims requiring external corroboration.
- The site contains one order/contact form and no detected login form or password-submission form.

Summary Verdict

The website has a **low-trust posture** with elevated risk for sensitive interaction. Its coherent commercial presentation and technically functioning pages do not offset the confirmed external reputation contradictions, and the real-world operator remains unverified. Read-only review is the appropriate limited-use posture pending independent validation.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement and resolves through OVH infrastructure in France, which provides a mitigating layer against some forms of direct exposure but is not evidence that the operator or business is legitimate. Observed infrastructure is AS16276 operated by OVH - OVH SAS, with edge IPs reported in the supplied technical evidence.

Closing Assessment

Prospective users should defer credential submission, payment, and order commitments until the business identity, regulatory position, supplier claims, and transaction safeguards have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of petrabis.com.

- The request stayed on petrabis.com. It was not redirected to another domain. CLEAR
- Registration is published under OVH, SAS. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2026-10-18. NOTED
- The earliest public archive of this site is from 2013-06-22. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about petrabis.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
