- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Petshop.ru is a Russian consumer ecommerce website offering pet food, veterinary goods, litter, accessories, promotions, loyalty benefits, recurring automatic orders, and delivery across numerous cities; its apparent business model is direct retail sales supplemented by discounted repeat-order subscriptions.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam signals were observed. The domain has a long-established, densely documented history without evidence of suspicious repurposing, while major threat-intelligence checks and observed browser behavior were clean. The homepage presented a conventional retail experience, with no hidden or externally submitted credential forms, cryptocurrency functions, wallet interaction, clipboard manipulation, or cloaking.

- Domain provenance records show registration on 6 April 2000 (~26.34 years old), through RU-CENTER-RU, with registration valid through 30 April 2027.
- The domain has 1,547 archive snapshots spanning 6 December 2000–13 May 2026, covering 27 tracked years; the historical review found no semantic drift or suspicious repurposing.
- External reputation telemetry recorded zero malicious and zero suspicious detections, no malicious safe-browsing classification, no external threat-list hit, and no reported abuse for the observed infrastructure.
- Behavioral examination of the homepage found no brand impersonation, hidden forms, password forms submitted externally, suspicious inline scripts, cloaking, wallet-provider activity, or clipboard hijacking.

Regulatory Verification Notes

The website presents an ordinary retail business rather than a regulated financial, investment, brokerage, or cryptocurrency service. Accordingly, the absence of a financial-services licence claim is not adverse or operationally relevant. The supplied homepage evidence does not conclusively establish the merchant's full legal-entity disclosures, so contractual identity, consumer-protection terms, and recurring-order conditions should be taken from the site's applicable legal and checkout pages when required for procurement or compliance records. No matching third-party broker profile was identified, which is consistent with the site's non-broker business model and is not a licensing determination.

- The homepage is categorized as a pet-supplies ecommerce storefront and contains no financial, investment, brokerage, token, or cryptocurrency offering.
- The homepage describes automatic recurring orders as a discounted retail-purchase facility rather than an investment or deposit product.

- The homepage displays product prices, promotional discounts, delivery information, shopping actions, and a customer sign-in function consistent with direct-to-consumer retail.
- The assessed content contains no claimed regulator, financial licence, licence number, or regulated intermediary status.

What to Verify Next

For institutional onboarding or higher-value procurement, the merchant name and contracting entity should be matched between the checkout, terms, privacy notice, invoice, and payment descriptor. Delivery coverage, return and refund rights, veterinary-product restrictions, and cancellation mechanics for automatic orders should be reviewed for the purchaser's jurisdiction. Official customer-service channels should also be confirmed through the website's published help function before escalation of an order dispute.

- The homepage advertises delivery across a broad selection of cities, making destination-specific delivery and return conditions relevant to a purchase decision.
- The site provides a 24/7 help entry point, which can be used to confirm official support procedures.
- The homepage requests city selection, indicating that fulfilment terms may depend on location.
- A cookie notice states that continued use signifies agreement to cookie use, making the full privacy and cookie terms relevant to institutional review.

Summary Verdict

The website is a legitimate, established, and trustworthy ecommerce operation. Its identity, historical continuity, content, reputation, and observed behavior converge on a high-confidence assessment with no contradictory risk signals. Normal interaction, including account login, purchases, and standard account activity, is appropriate.

Infrastructure Integrity

The site uses Cloudflare CDN/WAF protection, and the observed address was an edge endpoint rather than a confirmed origin server. This reduces direct origin exposure and provides a meaningful security mitigation, although protective infrastructure is not independently proof of business legitimacy. Transport encryption was valid at the time assessed.

- The site was served from AS43298 (Storm Networks LLC, Russia) at the observed Cloudflare edge address 185.71.67.130.
- The TLS certificate was issued by R12 with domain validation and was valid until 16 August 2026.
- One CDN edge address was observed, with no origin-server candidate identified during the assessment.

Closing Assessment

Prospective customers may use the site normally, applying routine ecommerce controls such as reviewing order terms, retaining purchase records, and monitoring payment confirmations.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of petshop.ru.

- The request stayed on petshop.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-04-30. NOTED
- The earliest public archive of this site is from 2000-12-06. CLEAR
- It is hosted on StormNetworks, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about petshop.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
