

Is phaztech.com a scam? TrustSniffer's high-risk assessment: 0/100

phaztech.com

Verdict

0

OUT OF 100

CRITICAL RISK

phaztech.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple maintenance/coming-soon page for a digital downloads store (Phaztech). No commerce functionality, forms, or trust/legal/contact information present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	8 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	15 days old Most scam domains are under a year old	RISK
Web archive	Archived since 2003 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YE2	NOTED

The page as captured

Sorry, we're doing some work on the site

What phaztech.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Phaztech presents a minimal "Phaztech Digital Download Store" landing page stating that the site is under construction. It appears intended to become an ecommerce storefront for digital goods, but it currently provides no active purchasing, account, or customer-support functionality.

Scam/Impersonation Risk

The site has a **confirmed external reputation contradiction**: it is blacklisted, with eight malicious detections recorded across the evaluated reputation checks and a Tier-1 detection from Sophos. This is materially more significant than the benign presentation of the homepage and supports a security-forward posture for sensitive interactions. No brand impersonation, phishing form, or conflicting legal-entity identity was observed on the available pages; the risk arises from the external malicious and blacklist findings rather than from an active scam mechanism visible in the captured page.

EVIDENCE

- External reputation checks recorded 8 malicious detections and a blacklist hit; Sophos was the named Tier-1 detecting vendor.
- Historical records show the domain first observed in 2003, with an archive-reconciled age of 23.41409993155373 years.
- The historical record contains 152 archive snapshots spanning 2003–2024, covering 22 years.

Regulatory Verification Notes

The available page does not identify an operating company, licensing authority, registration number, or governing jurisdiction. Because the site is only a maintenance page, this is a disclosure and verification gap rather than evidence of a particular regulatory breach; however, the operator identity remains unverified and the business model is not yet sufficiently disclosed for a regulated engagement decision. The absence of a matching broker record provides no positive regulatory conclusion.

EVIDENCE

- The homepage contains only a construction notice and does not provide corporate, licensing, terms, privacy, refund, or contact disclosures.
- Hosting was observed on AS47583, AS-HOSTINGER, Hostinger International Limited, CY.
- The site's TLS certificate is issued by YE2 at DV validation level and is valid through 2026-11-05T13:36:51+00:00.
- The domain registrar is HOSTINGER operations, UAB.

What to Verify Next

Before any future launch-related engagement, independently confirm the operator's legal name and business registration through the relevant corporate registry, and confirm any required digital-commerce authorization with the applicable regulator. Contact and support channels should be validated through an independently sourced route, and any later payment or account workflow should be tested only after the external reputation contradiction has been resolved and the site's terms, refund process, and data-handling disclosures are available.

EVIDENCE

- The captured page provides no active forms, commerce workflow, external links, or sensitive-input interface.
- Behavioral testing completed 2 runs successfully, with 0 external XHR requests, 0 hidden forms, and 0 wallet-connect or wallet-sensitive runs.
- The homepage returned a stable HTTP 200 response during the captured behavioral checks.

Summary Verdict

The overall posture is **critical trust risk**, with the site unsuitable for login, credential submission, or financial interaction at this time. Its simple under-construction presentation does not offset the confirmed external reputation contradiction, while the real-world operator identity remains unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, with four observed Cloudflare edge addresses and additional potential origin candidates. This infrastructure can reduce direct exposure of the hosting environment, but it is only a mitigating technical control and does not establish site legitimacy or neutralize the external reputation findings.

Closing Assessment

Engagement should remain limited to non-sensitive observation until the reputation findings are independently cleared and the operator, legal disclosures, and operational workflows are established.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of phaztech.com.

- The request stayed on phaztech.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED

- The earliest public archive of this site is from 2003-03-22. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about phaztech.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
