

Is photolivebook.pro a scam? TrustSniffer's high-risk assessment: 0/100

photolivebook.pro

Verdict

0

OUT OF 100

CRITICAL RISK

photolivebook.pro shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 47%.

What this site appears to be

The HTML document is effectively empty (<html><head></head><body></body></html>); no content, links, forms, or metadata to evaluate.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	4 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	10 days old Most scam domains are under a year old	RISK
Web archive	Never archived No public history of this site	WATCH
Certificate	Encrypted connection Issued by YE1	NOTED

The page as captured

<https://photolivebook.pro/>

What photolivebook.pro served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

photolivebook.pro presents an effectively blank webpage with no visible text, links, forms, metadata, or functionality, so its purpose and business model cannot be established from the served content.

Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture**. External security detections include a confirmed blacklist result, multiple malicious classifications, and a Fortinet threat detection. These signals are materially more significant than the absence of malicious browser behavior observed during the limited interaction testing. No distinct legal-entity conflict or confirmed brand-impersonation finding was established, but the blacklist evidence is sufficient to require a security-forward response. The site should not be treated as suitable for login, credential submission, financial activity, or other sensitive interaction.

EVIDENCE

- External reputation analysis recorded the domain as blacklisted, with blacklist sources identified as VT and EXTERNAL_BLACKLIST.
- External scanning recorded 4 malicious detections and 1 suspicious detection; Fortinet was identified among the flagged vendors.
- The homepage contained no login form, sensitive form, hidden form, wallet connection, or external network activity during two successful browser runs.

Regulatory Verification Notes

The available site material provides no identifiable operator, legal-entity information, licensing statement, registration number, or governing terms. This is a regulatory and transparency gap rather than independent proof of fraud, but it prevents meaningful on-site verification of who operates the domain or what activity it is intended to support. Identity remains unverified. The use of Cloudflare infrastructure and a domain-validated certificate establishes transport and delivery characteristics only; it does not validate the operator or any regulatory status.

EVIDENCE

- The homepage contained no legal, corporate, licensing, or regulatory disclosure.
- The domain registrar is Eranet International Limited.
- The site's TLS certificate is issued by YE1, uses domain validation (DV), and is valid to 2026-12-20.

What to Verify Next

Before any sensitive interaction, an independent security or compliance function should establish the real-world operator, confirm any claimed authorization with the relevant official registry, and determine whether the domain appears on current blocklists or internal controls. Any business need involving this domain should remain limited to non-interactive observation until those checks produce a documented clearance.

EVIDENCE

- The site's identity verification status is unverified, so operator attribution requires an independent source.
- No licensing or registration information is available in the served site material.
- The external blacklist and malicious-detection results require confirmation through an independently controlled security process.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not support treating the domain as a trustworthy or established service, and the combination of confirmed external threat detections with an unverified identity warrants a clearly cautionary disposition.

Infrastructure Integrity

The site is delivered through Cloudflare's CDN/WAF infrastructure, with observed addresses limited to CDN edge servers and no origin candidate visible in this analysis. This provides a mitigating layer against direct exposure of the hosting environment, but it is a protective delivery characteristic rather than evidence of legitimacy.

EVIDENCE

- Hosted on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- Observed edge address: 104.21.5.229; all four observed addresses were Cloudflare edge infrastructure.
- TLS certificate: issuer YE1, validation level DV, valid to 2026-12-20.

Closing Assessment

The domain should remain outside credential, account, payment, wallet, or other sensitive workflows unless independent operator, authorization, and security-clearance checks produce affirmative results.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of photolivebook.pro.

- The request stayed on photolivebook.pro. It was not redirected to another domain. CLEAR
- Registration is published under Eranet International Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-21. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about photolivebook.pro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
