

Is piarea.co.id legit? TrustSniffer's high-trust assessment: 100/100

piarea.co.id

Verdict

100

OUT OF 100

HIGH TRUST

piarea.co.id appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

PIAREA is an Indonesian environment and technology services company offering research, IT, digital media, and products with contact and office information; content and structure indicate a corporate brochure/portfolio site.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PIAREA presents itself as an Indonesian environment and technology services company providing consultancy, research, information-technology, digital-media, and related product services through a corporate brochure and portfolio website.

Scam/Impersonation Risk

No contradictions were observed. The site shows no detected phishing, brand-impersonation, malicious-content, or blacklist indicators, and its visible content describes a conventional corporate services model rather than an abuse-oriented or investment-promotion scheme. The homepage also presents no login form, sensitive data form, wallet connection, or externally submitted password mechanism. The domain's long registration continuity and consistent archival presence further support an established-site interpretation, although they do not independently prove the identity of the real-world operator.

EVIDENCE

- Domain registration telemetry: registered 2015-01-29 (~11.56 years old), with an expiration date of 2027-01-29.
- Archive telemetry: 125 snapshots spanning 2016–2026 (11 years tracked).
- Homepage analysis: corporate/portfolio content, no phishing indicators, no brand-impersonation indicators, and no sensitive forms detected.
- External reputation telemetry: no malicious or suspicious findings were recorded by the evaluated checks; no broker-dataset match was present.

Regulatory Verification Notes

The Profile, Contact Us, Client, Career, and service-navigation content supports the appearance of an operating consultancy, with environment and technology work, research and surveys, IT services, digital media, product listings, client references, and office/contact information. However, the site does not claim a regulatory license or provide a license number, so any activity requiring professional, sector-specific, or commercial authorization remains a matter for independent verification. The available evidence is consistent with an established, apparently legitimate website, but the operator's real-world identity is not independently verified. The absence of a third-party broker match is contextual reputational information, not a licensing or regulatory determination.

EVIDENCE

- Homepage and profile content: identifies PIAREA and describes environment-and-technology services, research, IT, digital media, products, clients, and contact/office information.
- Domain-registration telemetry: registrar recorded as PT Digital Registra Indonesia.
- Transport security telemetry: TLS certificate issued by WE1, validation level DV, valid to 2026-10-07.
- Site metadata: page title is "Home - PIAREA"; structured metadata and a meta description were not detected.

What to Verify Next

Before credential or payment interactions, an enterprise or prospective customer should independently confirm the contracting entity, applicable business or professional authorizations, the return and cancellation terms for any products, and the payment protections available for the proposed transaction. Contact details should be confirmed through an independently sourced channel rather than relying solely on information presented on the site.

EVIDENCE

- The site's navigation exposes Profile, Contact Us, Client, and Career areas that can be compared with independently sourced corporate records.
- The service and product presentation indicates that contractual scope, invoicing entity, delivery obligations, and applicable terms should be confirmed before engagement.
- The site's payment, return, and cancellation arrangements are not established by the supplied page evidence and should be obtained before a purchase.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established corporate website and no observed scam or impersonation contradictions. The conclusion supports ordinary site interaction, subject to proportionate independent confirmation of the operator and transaction terms because identity verification is incomplete.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct exposure and common delivery-layer abuse; this protection is supportive but is not proof of organizational legitimacy. Observed addresses were CDN edge addresses, and no origin candidate was identified in the infrastructure analysis.

EVIDENCE

- Hosting telemetry: served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Observed edge IP telemetry: 104.21.19.239, 172.67.190.125, 2606:4700:3030::ac43:be7d, and 2606:4700:3036::6815:13ef.
- Infrastructure analysis: four CDN edge addresses observed and zero likely origin addresses identified.

Closing Assessment

Routine browsing and ordinary business research are proportionate; before submitting credentials or making payments, standard independent merchant-identity, contractual, return-policy, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of piarea.co.id.

- The request stayed on piarea.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

- The registration is paid up to 2027-01-29. NOTED
- The earliest public archive of this site is from 2016-03-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about piarea.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
