

Is picks.my legit? TrustSniffer's high-trust assessment: 93/100

picks.my

Verdict

93

OUT OF 100

HIGH TRUST

picks.my appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Article aggregator site (Todaystory/picks.my) presenting curated stories across news, travel, environment, entertainment and lifestyle. Uses a CMP with many advertising vendors; appears to be an ad-supported publisher rather than a financial or credential-harvesting service.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://picks.my/en_v2/list.html

What picks.my served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

picks.my is an advertising-supported news and content-aggregation website branded as Todaystory, presenting curated articles across news, travel, environment, entertainment, fashion, food, health, mindfulness, lifestyle, and horoscope topics for general readers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents editorial content rather than financial solicitation, cryptocurrency activity, credential collection, or other high-risk transaction mechanics. The captured site had no login form, sensitive form, wallet-connection behavior, cloaking, or suspected brand impersonation, and external reputation checks did not identify malicious or phishing indicators. The apparent use of a consent-management platform and advertising partners is consistent with the stated publishing model, although advertising links should still be assessed by their destination rather than assumed trustworthy.

EVIDENCE

- The homepage is categorized as a news/media aggregator and displays article sections from sources including The Conversation, Inven Global, Weathernews, and HapsKoreaMagazine.
- The homepage contained no login form, hidden sensitive form, or untrusted form destination.
- Observed browser behavior recorded no wallet connection, wallet-drainer activity, clipboard hijacking, cloaking, or suspicious inline scripts.
- Evaluated external reputation checks returned no malicious, suspicious, phishing, or blacklist finding for the site.

Regulatory Verification Notes

The available content is consistent with a publisher rather than a regulated financial service, so a financial license is not inherently expected for the apparent business model. The site content does not independently verify the real-world operator behind the publication; its presentation as Todaystory should therefore be treated as an on-site identity claim rather than proof of corporate identity. Registration information provides supporting administrative context through Webplus Digital Sdn Bhd., with Qinetics Solutions Sdn Bhd. recorded as the organization, but this does not by itself establish that either party operates the publication. No adverse broker-reputation match was identified. The principal verification point is therefore operator and editorial-business identity, not evidence of scam activity.

EVIDENCE

- Domain registration: 2021-04-24; age 5.32 years; registrar Webplus Digital Sdn Bhd.
- The homepage presents the publication name "Todaystory" and a multi-topic editorial aggregation model.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M04 (DV), valid to 2027-03-11.

What to Verify Next

Before any credential or payment interaction associated with the site or an advertised destination, an independent check should confirm the operator's legal identity and official contact channels. For advertising or externally linked content, the destination, privacy terms, and consent choices should be reviewed separately, and payment-protection and return-policy checks should be completed where a commercial transaction is involved.

EVIDENCE

- The homepage uses a consent-management platform and supports personalized advertising through multiple advertising vendors.
- The captured page is content-focused and contains no sensitive transaction form, reducing the need for immediate credential or payment interaction on the site itself.
- The available page material identifies the publication brand but does not independently establish its real-world operator.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk publishing website. The overall trust posture is high, with no observed scam, phishing, impersonation, or other contradictory signal; however, the real-world operator identity remains unverified.

Infrastructure Integrity

The site is protected by Amazon CloudFront CDN/WAF infrastructure, with observed traffic terminating on CDN edge servers rather than exposing a directly observable origin. This provides a meaningful infrastructure-mitigation benefit by reducing direct origin exposure, but it is a protective hosting characteristic rather than proof of organizational legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before credentials or payments are entered, ordinary independent checks of the merchant or service identity, applicable return terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of picks.my.

- The request stayed on picks.my. It was not redirected to another domain. CLEAR
- Registration is published under Webplus Digital Sdn Bhd.. CLEAR
- DNS for this domain is served by awsdns-42.com, across 4 name servers. NOTED
- The registration is paid up to 2028-04-24. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about picks.my at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
