

Is picpay.com legit? TrustSniffer's high-trust assessment: 100/100

picpay.com

Verdict

100

OUT OF 100

HIGH TRUST

picpay.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 65%.

What this site appears to be

Official-looking PicPay marketing/landing page describing digital banking features (account, cards, loans, investments, insurance), with legal footer including company registration and physical address; includes cookie/privacy consent text.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PicPay.com presents an established-looking digital banking and mobile payments service, offering visitors access to digital accounts, cards, lending, investments, insurance, payment tools, and business services through a “next bank” model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent financial-services proposition, identifies the PicPay brand consistently, and contains no detected phishing, impersonation, malicious-content, or blacklist indicators. The available technical and historical evidence is consistent with an established website rather than a recently created or repurposed scam domain; however, the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage is a corporate financial-services landing page with substantial product content, a consistent PicPay identity, and no detected phishing or impersonation indicators.
- The domain was registered in 2001 and has remained registered for approximately 24.85 years.
- The archive record contains 328 snapshots spanning 2003–2026, covering 24 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

The site’s legal footer includes a company registration reference and physical address, which supports basic corporate disclosure. The available page material does not independently establish regulatory authorization for every financial product described, and no license number or licensing authority is identified in the supplied evidence; this is a verification gap rather than evidence of deception. A separate broker-reputation dataset produced no match, which is a limited contextual signal and not a licensing or regulatory determination. The site’s public-facing materials describe accounts, cards, loans, investments, insurance, and related payment services, so the applicable authorization and consumer-protection framework should be confirmed for the specific service being considered.

EVIDENCE

- The homepage legal footer displays company-registration information and a physical address.
- The site's hosting infrastructure is AS16509, Amazon.com, Inc., US.
- The site's transport encryption uses an Amazon RSA 2048 M04 certificate with DV validation, valid through 2026-12-02.
- The page presents financial products and customer-support or regulatory-information content, but the supplied material contains no license number or named licensing authority.

What to Verify Next

Before credential or payment interactions, an institution or prospective customer should independently confirm that the legal entity shown in the footer corresponds to the intended PicPay service, check the relevant financial-services registry for the products involved, and review the applicable terms, fees, withdrawal conditions, privacy provisions, and dispute-resolution process. Payment-protection options and official support channels should also be confirmed through independently sourced contact details rather than relying solely on page links.

EVIDENCE

- The homepage links visitors toward customer-account access and account opening, making independent confirmation of the official service endpoint appropriate before authentication.
- The homepage includes cookie and privacy-consent language, supporting review of data-use terms before account creation.
- The page describes lending, investment, insurance, card, and payment functions, each of which may carry distinct contractual and regulatory conditions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary interaction. The conclusion is strong at the website-risk level, while the connection between the online service and a specific real-world operating entity is not independently verified.

Infrastructure Integrity

The site is served from Amazon infrastructure, with the observed usage classified as content-delivery-network infrastructure. Its valid Amazon-issued DV certificate and stable technical delivery are mitigating infrastructure signals, although hosting and TLS alone do not establish the operator's identity or regulatory status.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credential or payment use should proceed only after the ordinary independent merchant-identity, service-terms, and payment-protection checks have been completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of picpay.com.

- The request stayed on picpay.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-41.org, across 4 name servers. NOTED
- The registration is paid up to 2027-10-10. CLEAR
- The earliest public archive of this site is from 2003-09-20. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about picpay.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
