

Is picturethisai.com legit? TrustSniffer's high-trust assessment: 100/100

picturethisai.com

Verdict

100

OUT OF 100

HIGH TRUST

picturethisai.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 65%.

What this site appears to be

Official-style landing page for PictureThis, a plant-identification and care application. It promotes photo-based identification, disease diagnosis, toxicity information, care recommendations, educational plant content, a free trial or download, and an optional premium subscription.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established plant-identification and care platform that presents the PictureThis mobile application, a plant encyclopedia, disease-diagnosis and toxicity information, and practical care guidance, operating through free access or trial entry points and an optional premium subscription.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious reputation findings, or deceptive sensitive-data collection mechanisms were observed. The homepage's claims of more than 100 million downloads and 1.2 million five-star reviews are promotional assertions rather than independently substantiated metrics within the supplied evidence, but they appear within a coherent, content-rich product presentation and are not accompanied by fraudulent payment, credential-harvesting, or manipulation patterns. A long-established domain, sustained historical presence, significant global traffic footprint, and clean external reputation collectively support the conclusion that this is the legitimate PictureThis service.

- The homepage consistently identifies PictureThis as a plant-identification application and contains no login form, hidden form, sensitive form, untrusted form destination, or suspected brand impersonation.
- External reputation screening recorded no malicious or suspicious detections, no harmful browsing classification, no external blacklist finding, no abuse reports, and no signature matches.
- The domain was registered on 20 July 2017 and is approximately 9.04 years old; registration is maintained through GoDaddy.com, LLC and expires on 20 July 2027.
- The web archive contains 400 snapshots spanning 3 February 2018 to 13 July 2026, representing 9 years of tracked history with no suspicious repurposing or semantic drift; the domain also holds a global traffic rank of 36,601.

Regulatory Verification Notes

PictureThis presents a conventional consumer software and informational-content model rather than a financial, investment, brokerage, or other regulated service. The available homepage material references support and legal-policy resources, while no licensing claim or regulatory authorization is presented; for this business model, that absence is not an adverse legitimacy indicator. No matching broker record was identified in the supplied third-party broker context, which is consistent with the site's non-broker activity and should not be interpreted as a legal finding.

- The homepage describes plant identification, disease diagnosis, toxicity information, care recommendations, educational content, and mobile-application access.

- The homepage navigation includes an About Us area and references legal-policy and support material, providing conventional consumer-software disclosure pathways.
- The observed business model is subscription-supported software, with no cryptocurrency, investment, trading, brokerage, or wallet functionality detected.
- The third-party broker-intelligence dataset produced no match for the site; this is contextual only and does not determine legal or regulatory status.

What to Verify Next

Routine due diligence should confirm that the application-store publisher matches the website's stated brand, review the current premium renewal and cancellation terms before purchase, and assess the privacy policy for the handling of uploaded photographs, device information, and account data. Plant-toxicity and disease guidance should also be treated as informational assistance rather than a substitute for qualified medical, veterinary, or horticultural advice.

- The homepage directs visitors toward an application download through "Try for Free" and "Download the App for Free" calls to action, making publisher and billing-term confirmation the relevant transaction checks.
- The service's stated functionality involves user-supplied plant photographs, creating a practical basis for reviewing image retention and personal-data handling terms.
- The homepage offers disease, treatment, and toxicity guidance, making the scope and limitations of that advice relevant to safe reliance.

Summary Verdict

The site is legitimate, established, and trustworthy. Its identity, provenance, content quality, reputation, and observed behavior converge without contradiction, supporting normal interaction, including account login and standard use.

Infrastructure Integrity

The site is served through Amazon infrastructure, which provides mainstream delivery capacity and limits conclusions that can be drawn from the shared edge address alone. Valid domain-validated transport encryption protects browser-to-site communications; these controls mitigate technical exposure but are supporting safeguards rather than independent proof of legitimacy.

- The hosting infrastructure serves the site from AS16509, operated by AMAZON-02 — Amazon.com, Inc., US.
- The site's TLS certificate was issued by Amazon RSA 2048 M02 with domain validation and is valid until 24 September 2026.
- Behavioral testing completed two successful runs without cloaking, suspicious inline scripts, clipboard hijacking, wallet-drainer activity, hidden forms, or console errors.

Closing Assessment

Normal use is appropriate, with standard consumer diligence applied to subscription terms, privacy preferences, and reliance on informational guidance.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of picturethisai.com.

- The request stayed on picturethisai.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-06.org, across 4 name servers. NOTED
- The registration is paid up to 2027-07-20. NOTED
- The earliest public archive of this site is from 2018-02-03. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about picturethisai.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with

a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
