

Is pie-experiences.com safe? TrustSniffer's low-trust assessment: 40/100

pie-experiences.com

Verdict

40

OUT OF 100

LOW TRUST

pie-experiences.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Commercial site for Pie Experiences, a South America-based tour operator offering custom private tours, packaged trip listings with prices, contact numbers and booking CTA. Content focuses on Peru, Bolivia, Chile, Argentina and related experiences.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Pie Experiences is a commercial South America travel website presenting customized private tours, packaged trips, destination guides, prices, contact channels, and booking options for destinations including Peru, Bolivia, Chile, Argentina, Colombia, and Ecuador.

Scam/Impersonation Risk

The site's travel content is coherent and commercially presented, with tour descriptions, pricing, contact details, and a booking call to action; page analysis found no login form, wallet-connect behavior, hidden forms, or apparent brand impersonation. However, this positive page-level presentation is outweighed by confirmed external contradictions: two malicious detections were recorded and the domain appears on a confirmed blacklist. No conflicting legal-entity names or on-page impersonation indicators were observed, but the external reputation findings create a material risk for booking, payment, and other sensitive interactions.

EVIDENCE

- Homepage: Presents private and packaged South America tours, destination-specific services, prices, contact information, and a booking call to action.
- Homepage behavior: One contact/booking form was observed; no login form, hidden sensitive form, wallet activity, clipboard manipulation, or cloaking was detected.
- External reputation telemetry: 2 malicious detections were recorded, with a confirmed blacklist status.
- Domain registration: Registered 2016-09-03 and approximately 9.97 years old; archival records show first capture on 2016-11-06, last capture on 2026-07-28, and 11 years tracked.

Regulatory Verification Notes

The About and Booking Conditions pages support the appearance of a functioning tour-operator business, while the registration record names Peru Incredible Experiences srl. This establishes a useful identity lead but does not independently verify that entity's relationship to the website. The available site content does not present a licensing claim or license number, so the principal regulatory issue is a verification and disclosure gap rather than proof of misconduct. The absence of a matching broker-dataset record provides no additional regulatory assurance or adverse finding.

EVIDENCE

- About page: Provides the site's business presentation but does not independently verify the operating entity.
- Booking Conditions page: Provides contractual terms, but the available evidence contains no displayed license authority or license number.
- Domain registration record: Registrar is Infomaniak Network SA; registrant organization is listed as Peru Incredible Experiences srl.
- Hosting infrastructure: Served on AS29222 (Infomaniak-AS - Infomaniak Network SA, CH); TLS certificate issued by YR2 at DV validation level, valid to 2026-10-28T21:44:58+00:00.

What to Verify Next

Before any booking or payment, an independent registry or tourism-authority check should confirm the operating entity's legal status and authorization to sell the advertised travel services. The Booking Conditions page should be reconciled with independently confirmed cancellation, refund, and payment-protection terms. Contact channels should also be authenticated through an independent, offline route before sensitive information or funds are exchanged.

EVIDENCE

- About page: Use the stated business identity as the subject of an independent entity and tourism-authorization check.
- Booking Conditions page: Compare cancellation, refund, and dispute provisions with the terms presented during any booking or payment process.
- Contact page: Authenticate the published contact channels independently before relying on them for payment or account-related matters.

Summary Verdict

The website presents as a plausible travel operator, but the overall posture is **low trust** because confirmed external threat and blacklist findings materially undermine confidence in sensitive engagement. Identity verification remains incomplete, and the available evidence does not support treating the site as suitable for credentials, payments, or other high-impact interactions.

Infrastructure Integrity

The site resolves through Infomaniak Network SA in Switzerland, with no CDN or WAF identified in the supplied infrastructure evidence. This provides a known hosting context and valid transport encryption, but the hosting arrangement is not itself proof of operator legitimacy and does not offset the external reputation risk.

Closing Assessment

Use should remain limited to non-sensitive informational browsing unless the operator, contractual protections, and payment route have been independently validated through trusted channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pie-experiences.com.

- The request stayed on pie-experiences.com. It was not redirected to another domain. CLEAR
- Registration is published under Infomaniak Network SA. CLEAR
- DNS for this domain is served by infomaniak.ch, across 2 name servers. NOTED
- The registration is paid up to 2026-09-03. NOTED
- The earliest public archive of this site is from 2016-11-06. CLEAR
- It is hosted on Infomaniak-AS, from a server in CH. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pie-experiences.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
