

Is pinglady.org legit? TrustSniffer's high-trust assessment: 100/100

pinglady.org

Verdict

100

OUT OF 100

HIGH TRUST

pinglady.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

PingLady is a non-profit incubator focused on empowering women in technology through training, mentorship, events and subsidised office space. The site provides program descriptions, location and contact information, and a cookie/privacy notice. No solicitation for payments beyond donations/sponsorships and no credential harvesting detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PingLady is a non-profit innovation incubator focused on empowering women in technology through training, mentorship, events, skills development, and subsidised office space, with activities supported through donations, sponsorships, partnerships, and related programmes.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity-contradiction signals were observed. The homepage presents a coherent non-profit purpose and specific programmes, including a Training Hub, mentorship, an Event Hub, an Innovation Hub, and donation and sponsorship participation. The site does not present credential-harvesting forms, cryptocurrency functions, deceptive payment mechanics, or other high-risk interaction patterns. Its apparent identity is consistent with an established site, although the real-world operator is not independently verified.

EVIDENCE

- The homepage identifies PingLady as a non-profit innovation incubator and describes training, mentorship, events, and subsidised office space.
- The observed site behaviour recorded no login form, hidden form, external sensitive form, wallet connection, wallet drainer, clipboard hijack, cloaking, or suspicious inline scripts.
- Domain registration evidence records creation on 2016-11-13, making the domain approximately 9.77 years old.
- Archive coverage is recorded from 2018-08-10 through 2025-07-18, with 8 years tracked and no detected suspicious repurposing or semantic drift.

Regulatory Verification Notes

The About Us, Operations, Contact Us, privacy, and programme pages provide an identifiable organisational narrative, location and contact information, but the available material does not establish the operator's legal identity independently. No licensing claim, registration number, or licensing authority is presented; for the stated non-profit and educational model, this is a disclosure item to confirm rather than evidence of wrongdoing. The available external reputation checks found no malicious or suspicious detections, and no broker-related match was identified. The site's transport security is valid, but the certificate is domain-validated rather than an organisational identity certificate.

EVIDENCE

- The About Us, Operations, Contact Us, and Privacy Policy pages are present in the site navigation; the Contact Us content supplies location and contact information.
- The site's TLS certificate is issued by YR2, uses DV validation, and is valid through 2026-11-10T18:35:23+00:00.
- The site is served through AS327979, operated by DIAMATRIX C.C - DIAMATRIX C.C, ZA.
- External reputation results recorded zero malicious and zero suspicious detections among the evaluated results; coverage was partial.

What to Verify Next

Before credential or payment interactions, an institution or prospective participant should independently confirm the organisation's legal name, donation or sponsorship recipient, and any applicable non-profit registration with the relevant authority. Contact details and programme claims should be cross-checked through an independently sourced channel, and payment protection, refund, and donation-recipient information should be confirmed before funds are transferred. Official social profiles should also be checked for continuity with the site's stated activities.

EVIDENCE

- The Contact Us page provides location and contact information suitable for independent cross-checking.
- The site links to Facebook, Instagram, and Twitter profiles, providing external continuity checks for the organisation's public presence.
- The Donation, Sponsorship, and programme pages define the stated engagement routes and should be reviewed alongside any payment instructions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk non-profit website. The convergence of coherent organisational content, stable technical behaviour, clean evaluated reputation signals, and sustained domain presence supports a high-trust posture, while the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to a single hosting endpoint rather than through a detected CDN or WAF. Its hosting is attributable to DIAMATRIX C.C in South Africa on AS327979; this provides a clear infrastructure observation but is a mitigating technical signal only and does not independently establish organisational legitimacy.

Closing Assessment

Normal informational use is proportionate, while independent identity, recipient, and payment-protection checks should be completed before credentials or funds are provided.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pinglady.org.

- The request stayed on pinglady.org. It was not redirected to another domain. **CLEAR**
- Registration is published under Diamatrix C.C.. **CLEAR**
- DNS for this domain is served by pingtechhosting.com, across 4 name servers. **NOTED**
- The registration is paid up to 2026-11-13. **NOTED**

- The earliest public archive of this site is from 2018-08-10. CLEAR
- It is hosted on DIAMATRIX C.C, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pinglady.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
