

Is pISOforte.com legit? TrustSniffer's high-trust assessment: 75/100

pISOforte.com

Verdict

75

OUT OF 100

HIGH TRUST

pISOforte.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate website for SHANDONG JIEMAO NEW MATERIAL CO. LTD (九游/捷茂). Lists product families (functional masterbatch, high-concentration color masterbatch, biodegradable carriers, specialty carriers), applications, testing equipment, certifications (ISO9001, RoHS/REACH) and multiple contact phone numbers. Primarily a product/catalog and contact page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Chinese-language corporate product catalogue for SHANDONG JIEMAO NEW MATERIAL CO. LTD, presenting polymer materials, color masterbatch, specialty additives, applications, testing capabilities, certifications, and telephone contacts for an apparent business-to-business manufacturing and sales model.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or identity-contradiction signals were observed. The homepage is a conventional corporate catalogue with no login form, sensitive data-collection form, cryptocurrency functionality, investment solicitation, or conspicuous scam-oriented promise. Behavioral testing identified two suspicious inline scripts, two non-whitelisted external posts, and a high volume of console errors. These were observed by behavioral testing but were not accompanied by hidden forms, wallet activity, cloaking, credential capture, or page-level fraud indicators, so they are discounted as likely implementation or third-party integration noise rather than evidence of impersonation. The available evidence is consistent with an established-looking site, although the real-world operator remains independently unverified.

EVIDENCE

- The homepage presents a corporate/product-catalogue layout, with no login form, hidden form, or sensitive form detected.
- The homepage's behavioral execution recorded 2 suspicious inline scripts, 2 non-whitelisted external posts, and 102 console errors, while recording 0 wallet-connect, wallet-drainer, clipboard-hijack, or hidden-sensitive-form events. The scripts, external posts, and console errors are treated as implementation or third-party integration signals because no related credential capture, wallet activity, or other page-level fraud behavior was observed.
- The site's historical archive contains 381 snapshots spanning 2008–2026, covering 19 tracked years without a detected suspicious repurposing or semantic-drift event.

Regulatory Verification Notes

The site identifies SHANDONG JIEMAO NEW MATERIAL CO. LTD and describes commercial manufacturing, custom formulation, and technical-support activities. It references ISO9001 and RoHS/REACH certifications, but the supplied pages do not provide an independently verifiable licensing or corporate-registration reference. For a materials supplier, this is a transparency gap requiring ordinary commercial validation rather than an indication of fraud. The operator identity is not independently verified. The available third-party broker dataset contains no matching record; this is a soft third-party reputation or data-coverage note, discounted because no related identity inconsistency or other contradiction was observed. The site's valid transport encryption and sustained historical presence support an evidence-consistent assessment of a potentially genuine commercial site, but they do not establish legal ownership or certification validity.

EVIDENCE

- The homepage names SHANDONG JIEMAO NEW MATERIAL CO. LTD and lists functional masterbatch, high-concentration color masterbatch, biodegradable carriers, specialty carriers, testing equipment, and product applications.
- The homepage cites ISO9001 and RoHS/REACH certifications; no license number or licensing authority is supplied in the reviewed content.
- WHOIS records creation date 2026-03-08, expiration date 2027-03-08, and age_years 0.45; the registration provider is GMO Internet Group, Inc. d/b/a Onamae.com.
- TLS is valid, uses DV validation, is issued by YE2, and is valid to 2026-11-11T05:49:05+00:00.

What to Verify Next

Before a commercial order or payment, independently confirm the company's legal registration, manufacturing address, certification numbers, product specifications, and contractual seller identity through an authoritative corporate or certification registry. Confirm published telephone channels through an independent business directory or offline source, obtain written terms covering delivery, quality acceptance, returns, and remedies, and use payment arrangements that provide appropriate commercial protection. Credentials should be used only after confirming that the intended account or service relationship is genuinely required by the supplier.

EVIDENCE

- The homepage provides three telephone numbers—13505388389, 15621359333, and 0538-8811686—for independent channel confirmation.
- The product and applications sections describe materials for automotive, electronics, cable, packaging, agricultural, construction, and engineering-plastics uses, making specification and quality-document verification relevant to procurement.
- The site contains no sensitive submission form, so the principal verification need concerns commercial identity, product documentation, and transaction terms rather than an observed credential-capture mechanism.

Summary Verdict

The overall posture is **high trust and low risk**, with no observed scam or impersonation contradiction. Available evidence is consistent with an established-looking, apparently legitimate corporate website, while the operator's real-world identity remains unverified and should not be treated as proven. The absence of a matching third-party broker record is a soft reputation or data-coverage note rather than a confirmed adverse finding.

Infrastructure Integrity

The site resolves directly to a single likely origin address rather than a detected CDN edge, with no CDN or WAF identified. Hosting is provided by AROSS-AS – AROSSCLOUD INC. in the United States on AS400619; this is a neutral infrastructure observation, and the presence or absence of protective edge services does not establish legitimacy.

EVIDENCE

- Served from AS400619 (AROSS-AS – AROSSCLOUD INC., US), with the resolved address 156.241.177.48.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- The site's TLS certificate uses DV validation, is issued by YE2, and expires 2026-11-11T05:49:05+00:00.

Closing Assessment

The site may be suitable for ordinary business evaluation, provided that independent merchant-identity, certification, contractual, return-policy, and payment-protection checks are completed before credentials or funds are committed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pisoforte.com.

- The request stayed on pisoforte.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by share-dns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-08. NOTED
- The earliest public archive of this site is from 2008-01-02. CLEAR
- It is hosted on AROSS-AS, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pisoforte.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
