- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PJBank is an established Brazilian B2B financial-services platform presenting boleto, Pix, card-receiving, ERP integration, payment APIs, and digital account services for businesses.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate payment-services model rather than investment solicitation, returns promises, or consumer lending; it explicitly warns that PJBank does not provide loans to individuals. The site's stated services, business testimonials, legal links, and compliance references align with its apparent B2B purpose, while technical behavior showed no phishing, hidden-form, wallet-drainer, cloaking, or suspicious external-activity indicators. External reputation checks found no malicious or suspicious detections, blacklist hit, or brand-impersonation signal.

- Homepage: describes boleto, Pix, card receiving, ERP integration, APIs, sandbox access, and Open Banking services.
- Homepage: explicitly states that PJBank does not provide loans to individuals and warns visitors to avoid scams.
- Homepage behavior: two successful runs with no hidden forms, external posts, wallet activity, clipboard hijacking, or cloaking.
- Domain registration: Registered 2016-10-06 (~9.82 years old).

Regulatory Verification Notes

The homepage identifies a business-oriented financial infrastructure operation and provides compliance references, contact details, and legal links. The supplied content does not establish a specific license number or named regulatory authority, so applicable authorization remains a verification item rather than a negative legitimacy finding. The registered entity is PJBank Pagamentos S.A.; no conflicting legal identity was observed.

- Archive history: 95 snapshots spanning 2017–2026, with 10 years tracked and no suspicious repurposing identified.
- Hosting: Served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- Transport security: TLS certificate issued by Amazon RSA 2048 M04, DV validation, valid to 2026-10-31.
- Homepage: provides compliance information, contact details, and legal links.

What to Verify Next

Confirm the applicable authorization or registration status with the relevant Brazilian regulatory registry before entering into a regulated financial arrangement. Independently confirm the official support and contracting channels through published corporate records or an established offline contact route.

- Homepage: presents payment infrastructure and ERP-integrated transaction services for businesses.
- Homepage: links to compliance and legal information but does not provide a license number in the supplied content.
- Registration data: identifies PJBank Pagamentos S.A. as the domain registrant.

Summary Verdict

The website presents a legitimate, established, and trustworthy corporate service with strong identity, operational, historical, and technical consistency. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is hosted on Amazon infrastructure with a valid Amazon-issued DV certificate. This provides a stable and professionally managed delivery environment and serves as a mitigating infrastructure signal, although it is not independently proof of legitimacy.

Closing Assessment

Standard business engagement is appropriate, with authorization and contractual due diligence completed where the proposed service or transaction requires it.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pjbank.com.br.

- The request stayed on pjbank.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-49.org, across 2 name servers. NOTED
- The registration is paid up to 2027-10-06. CLEAR
- The earliest public archive of this site is from 2017-07-11. CLEAR

- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pjbank.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
