

Is planetahosting.cl legit? TrustSniffer's high-trust assessment: 98/100

planetahosting.cl

Verdict

98

OUT OF 100

HIGH TRUST

planetahosting.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Commercial Chile-based web hosting provider offering SSD NVMe hosting, VPS, dedicated servers, domain registration and SSL. Page contains detailed plan pricing, features, datacenter claims, support contacts and payment methods.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What planetahosting.cl served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Chile-based commercial hosting provider offering shared web hosting, VPS and dedicated servers, colocation, domain registration, SSL certificates, migrations, support, and related infrastructure services. Its homepage presents recurring hosting plans with SSD NVMe storage, LiteSpeed, email accounts, databases, included domains, payment options, and promotional pricing, consistent with a conventional hosting and SaaS business model rather than an investment or high-risk financial service.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or other contradictory signals were observed. The site presents a coherent commercial hosting proposition, provides product and support information, and does not expose a login form, password form, wallet connection, or other sensitive submission mechanism in the captured page. Behavioral testing recorded external requests and some non-whitelisted network posts, but no hidden forms, credential destinations, cloaking, wallet activity, clipboard manipulation, or DOM mutations were detected; the activity therefore does not establish an abuse pattern. Available evidence is consistent with an established, apparently legitimate website, while its real-world operator identity remains independently unverified.

EVIDENCE

- The domain registration record shows creation on 2013-08-20, making the domain approximately 13 years old; the registrar is NIC Chile, and the record lists Servicios Computacionales Hosting Ltda.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, a false phishing-site status, and no external blacklist match.
- The homepage contains no login form or sensitive form, and brand-impersonation analysis reported no suspected impersonated brand.
- Behavioral telemetry recorded 8 external XHR requests and 10 external POST requests, including 2 non-whitelisted XHR requests and 2 non-whitelisted POST requests, with no credential-harvesting or wallet-drainer behavior.

Regulatory Verification Notes

The available material supports a conventional hosting-provider business model and does not present the site as a regulated financial service. No license claim or license number is recorded in the available site material, so regulatory licensing is not a central legitimacy issue for the advertised hosting services but remains a transparency point if a particular service requires formal authorization. The registration record provides a named registrant and a Chilean registrar, but the evidence does not independently verify that record as the operating entity behind the website. This is an identity-verification limitation, not an identity contradiction. The site's transport security is technically valid, although domain-validated TLS confirms encrypted communication rather than legal-entity identity.

EVIDENCE

- The homepage supplies detailed hosting plans, technical features, support information, and payment methods for a commercial service.
- The site's TLS certificate is issued by WR3, uses DV validation, and is valid through 2026-11-05.
- The domain registration record lists NIC Chile as registrar and Servicios Computacionales Hosting Ltda as the recorded owner.
- The domain appears within the established global web-traffic population at rank 42796.

What to Verify Next

Before credential or payment interactions, the prospective customer should independently confirm the merchant identity associated with the hosting subscription, review the applicable terms, renewal conditions, cancellation and refund provisions, and confirm that the selected payment method provides appropriate dispute or chargeback protection. If a regulated or jurisdiction-specific service is later offered, its licensing should be checked directly with the relevant official registry. Support and sales channels should also be validated through an independent route before a material transaction.

EVIDENCE

- The homepage displays plan prices, renewal-related promotions, and recurring hosting offerings that should be matched against the contractual terms.
- The site provides separate sales and support pathways, creating identifiable channels for independent confirmation.
- The advertised services include domain registration and SSL products, for which service scope, renewal ownership, and cancellation handling should be confirmed before purchase.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam or impersonation contradictions were observed, but the real-world operator identity is not independently verified, so legitimacy should be described as apparent rather than proven.

Infrastructure Integrity

The site resolves to a single direct hosting address on AS396982, operated by GOOGLE-CLOUD-PLATFORM / Google LLC in the United States. No CDN or WAF edge layer was detected, and the origin appears directly resolvable; Google Cloud hosting is a mitigating infrastructure signal, not proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to completing the standard independent merchant, contractual, and payment-protection checks before submitting credentials or making a material payment.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of planetahosting.cl.

- The request stayed on planetahosting.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by 85.41), across 9 name servers. NOTED

- The registration is paid up to 2029-02-28. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about planetahosting.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
