Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PlanetHoster.fr is a French-language commercial website offering recurring shared and semi-dedicated hosting, managed dedicated-cloud servers, domain registration, email, backups, migration, and related infrastructure services through published service tiers, promotional periods, renewal pricing, and technical specifications.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, malicious reputation findings, or suspicious page-content indicators were observed. The long-running domain and substantial archival continuity support PlanetHoster's established identity, with no evidence of repurposing into an unrelated business. The homepage presents a coherent hosting proposition and makes operational claims that include running infrastructure since 2007, operating three data centers, hosting more than 500,000 sites, and reporting 96.8% customer satisfaction across 7,188 verified reviews.

- The domain registration record shows registration on 11 December 2014, approximately 11.65 years old, through PLANETHOSTER.
- Historical records contain 111 archive snapshots spanning 21 February 2010 to 25 July 2026, representing 17 years of tracked history without detected semantic repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no reported infrastructure abuse, and placement within the top one million globally at rank 561,211.
- The homepage showed no sensitive or hidden forms, credential forwarding, cloaking, wallet interaction, clipboard hijacking, or suspicious inline scripts.

Regulatory Verification Notes

The observed business model is conventional web-hosting and cloud-infrastructure SaaS rather than a regulated financial, investment, or brokerage service. No licensing claim is made, and the supplied page evidence does not establish a need for sector-specific financial authorization. Commercial transparency is comparatively strong: the homepage publishes promotional and renewal pricing, defined plan features, service guarantees, and a 60-day money-back commitment.

- The homepage identifies shared hosting, semi-dedicated hosting, managed dedicated-cloud servers, domain services, WordPress support, email hosting, backups, migration, and SSL certificates as its principal offerings.
- The domain is registered through PLANETHOSTER and is currently recorded to expire on 11 December 2026.

- The site's transport encryption uses a valid DV certificate issued by YE2, valid until 27 August 2026.
- No corresponding broker entry or financial-regulatory claim was identified in the supplied third-party context.

What to Verify Next

For enterprise procurement, the appropriate next steps are ordinary supplier due diligence: obtain the governing contract and service-level commitments, confirm the scope and limitations of backups and migration assistance, validate data-location requirements against the offered hosting region, and confirm official support and escalation channels through the provider's published contact process.

- The homepage provides selectable country, language, and currency settings for France, Belgium, Canada, Switzerland, the United Kingdom, and international customers.
- The site exposes dedicated navigation for service status, contact information, company information, account access, and a technical blog.
- The commercial page distinguishes promotional pricing from renewal pricing and describes plan-level technical specifications.
- The homepage advertises hosting availability across France, Switzerland, and Canada, making data-location confirmation relevant to institutional onboarding.

Summary Verdict

PlanetHoster.fr is a legitimate, established, and trustworthy commercial website with consistent identity, mature operating history, clean external reputation, coherent services, and benign observed behavior. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure operated by PlanetHoster in France, without a detected third-party CDN or WAF layer. Direct origin visibility is consistent with the provider operating its own hosting network; it is neither an independent guarantee of legitimacy nor an identified security concern in this assessment.

- The site is served from AS53589, operated as PLANETHOSTER-8 – PlanetHoster, CA, with the observed host located in France.
- Infrastructure analysis identified one resolved address, no edge addresses, and one likely origin address.
- No third-party CDN vendor was detected.

Closing Assessment

Prospective customers may proceed with ordinary account creation and service use, applying standard contractual, resilience, and data-governance review for any business-critical deployment.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of planethoster.fr.

- The request stayed on planethoster.fr. It was not redirected to another domain. CLEAR
- Registration is published under PLANETHOSTER. CLEAR
- DNS for this domain is served by n0c.com, across 3 name servers. NOTED
- The registration is paid up to 2026-12-11. NOTED
- The earliest public archive of this site is from 2010-02-21. CLEAR
- It is hosted on PLANETHOSTER-8, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about planethoster.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
