

Is planetwaves.rocks legit? TrustSniffer's high-trust assessment: 80/100

planetwaves.rocks

Verdict

80

OUT OF 100

HIGH TRUST

planetwaves.rocks appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be	A testimonials page for Planet Waves (astrology site) containing many user comments praising Eric's readings, memberships, and published astrology products. No forms or payment flows are present on this capture; the content focuses on endorsements and user feedback.
------------------------------	--

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Planet Waves is an astrology content and membership website that presents horoscopes, personal readings, published astrology material, testimonials, subscriptions, and related paid offerings, with an apparent business model based on memberships, one-off readings, and audio or PDF products.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no indicators of phishing, brand impersonation, malicious behavior, or fraudulent redirection. The behavioral capture did record substantial DOM change after interaction, but it was not accompanied by hidden forms, external posting, wallet activity, cloaking, suspicious scripts, or credential-harvesting behavior; this is therefore treated as a limited technical observation rather than evidence of impersonation. The website presents as an established, apparently legitimate content service, although the real-world operator identity remains independently unverified.

EVIDENCE

- Domain registration continuity: created 2014-12-13; recorded age 11.69 years.
- The testimonials page contains extensive dated user feedback about readings, horoscopes, memberships, and published astrology products, with no page-level fraud indicators recorded.
- Behavioral testing recorded 5,187 maximum DOM changes after interaction, alongside 0 external XHR/fetch requests, 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 suspicious inline scripts.

Regulatory Verification Notes

The service model is informational and membership-oriented rather than presented as a regulated financial or investment service. The captured material does not state a regulatory license or registration number; this is a disclosure and verification gap, not evidence of a scam. Available technical and reputational signals support an established-site assessment: the domain is long-established, the transport certificate is valid and issued by a recognized certificate authority, and no adverse broker-reputation match or confirmed malicious reputation finding was recorded. The operator's legal identity should nevertheless remain treated as unverified rather than proven.

EVIDENCE

- The captured testimonials page describes paid readings, subscriptions, memberships, and audio/PDF products; no regulatory license claim or license number is shown in the supplied page material.
- The site is hosted on AS22612 (NAMECHEAP-NET - Namecheap, Inc., US).
- TLS uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-11-09T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant or service operator's legal identity, review the applicable cancellation and refund terms, and ensure that the payment method provides appropriate consumer protection. If the service is represented as regulated professional advice in a particular jurisdiction, confirm the relevant authorization directly with that jurisdiction's official registry. The capture should not be treated as evidence of checkout security because it contains testimonial content rather than a payment or account workflow.

EVIDENCE

- The captured page is titled "Planet Waves – Testimonials" and is focused on user comments rather than an account, checkout, or payment process.
- The page analysis recorded 0 forms, no sensitive form, and no payment flow in the captured view.
- The supplied material contains no independently verified operator identity signal.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. This supports ordinary site interaction in principle, while the absence of

independent operator-identity verification means legitimacy should not be described as conclusively proven.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Namecheap, Inc. in the United States, with one resolved IP and no CDN or WAF vendor identified in the supplied infrastructure facts. This is ordinary hosting context and neither proves legitimacy nor creates a material contradiction; the valid mainstream TLS deployment is a positive transport-security measure.

Closing Assessment

Proceed with normal proportionality, completing independent merchant-identity, service-term, and payment-protection checks before submitting credentials or making payments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of planetwaves.rocks.

- The request stayed on planetwaves.rocks. It was not redirected to another domain. CLEAR
- Registration is published under NameCheap, Inc.. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-13. NOTED
- The earliest public archive of this site is from 2016-03-27. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about planetwaves.rocks at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
