

Is plantasoltec.com legit? TrustSniffer's high-trust assessment: 100/100

plantasoltec.com

Verdict

100

OUT OF 100

HIGH TRUST

plantasoltec.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

SOLTECSA (Soltec) is a Nicaraguan company specializing in production and sale of asphalt products (including polymer-modified asphalts and various emulsions), construction project participation, training, and quality-control laboratory services. The page includes contact details and location information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the corporate site of Soltec, presenting a Nicaraguan business that manufactures and sells asphalt products and provides construction-related, training, and laboratory services for contractors, government-linked projects, and private customers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate/local-business model rather than a financial, cryptocurrency, or credential-collection service, and its content is consistent with the stated asphalt-manufacturing purpose. The site lists modified asphalt, polymer-modified asphalt, cationic emulsions, construction participation, training, and laboratory quality-control services; this product and service profile contains no apparent phishing, impersonation, or high-risk abuse pattern. Available external checks found no malicious or suspicious detections, and no brand-impersonation indicators were identified. The operator's real-world identity remains independently unverified, so the legitimacy conclusion is evidence-consistent rather than proven.

EVIDENCE

- Homepage: states that SOLTECSA is a Nicaraguan company producing and commercializing special asphalts, including polymer-modified products and asphalt emulsions.
- Homepage: provides a business telephone number, physical location, product catalogue, construction services, training, and laboratory information, with no login form or sensitive submission form.
- Domain registration: registered 2010 (~16.55 years old) through GoDaddy.com, LLC.
- Web archive: 54 snapshots spanning 2011–2025 (15 years tracked).

Regulatory Verification Notes

The site's published business description and location support an apparently established commercial identity, but the available evidence does not independently connect the website to a verified legal entity or person. The pages do not present a licensing claim, registration number, or regulatory authority; for an asphalt manufacturer and construction-services provider, this is a disclosure gap requiring ordinary commercial verification rather than evidence of deception. Registration privacy is an administrative detail and does not create an identity contradiction. No adverse broker-dataset match was identified.

EVIDENCE

- Homepage: identifies SOLTECSA as a Nicaraguan company and gives the location "Km 14 carretera a Masaya, 8km al este, contiguo a PROINCO."
- Homepage: describes participation in projects executed by FOMAV or MTI contractors and in private road-construction projects.
- Domain registration: registrar is GoDaddy.com, LLC; registrant organization is Domains By Proxy, LLC.
- Transport encryption: TLS certificate issued by YR2, validation level DV, valid to 2026-10-10T04:20:06+00:00.

What to Verify Next

Before a commercial engagement, independently confirm the company's legal registration, applicable industrial or construction authorizations, quotation terms, delivery obligations, product specifications, and warranty or return arrangements. Payment instructions should be matched against independently confirmed business details, and any requested credentials or payment information should be submitted only after normal merchant-identity and payment-protection checks have been completed.

EVIDENCE

- Product and services content: specifies asphalt types, emulsions, construction support, training, and laboratory services that can be matched against a formal quotation or contract.
- Contact information: provides a telephone number and physical location suitable for independent confirmation through an offline or separately sourced channel.
- Commercial transaction review: the site presents informational corporate content rather than an on-page checkout or sensitive-data form.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a low-risk corporate business model. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the available evidence does not independently verify the real-world operator.

Infrastructure Integrity

The site resolves directly to a single hosting address rather than a detected CDN edge layer and is hosted by LiquidNet US LLC in the United States. This infrastructure is operationally consistent with a conventional corporate website, but hosting arrangements alone are only a mitigating technical signal and do not establish ownership or legitimacy.

EVIDENCE

- Hosting infrastructure: served from AS14555 (LIQUIDNETLTD1 - LiquidNet US LLC, US), registry ARIN, country US.
- IP resolution: 1 unique IP, 0 edge IPs, and 1 likely origin IP candidate.
- Transport encryption: DV TLS certificate issuer YR2 with expiry 2026-10-10T04:20:06+00:00.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before credentials or payment interactions, ordinary independent checks of merchant identity, contractual terms, and payment protection should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of plantasoltec.com.

- The request stayed on plantasoltec.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by evolutionpremiumhosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-03. NOTED
- The earliest public archive of this site is from 2011-02-07. CLEAR

- It is hosted on LIQUIDNETLTD1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about plantasoltec.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
