Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is the Brazilian .com.br domain policlinicariovermelho.com.br, registered under the name Policlínica do Rio Vermelho LTDA; the supplied page evidence does not establish a visitor-facing product, service, or business model.

Scam/Impersonation Risk

No identity contradiction or explicit impersonation signal was recorded. However, the domain is confirmed as blacklisted by external sources, and multiple major security providers classified it as malicious or suspicious; this is a direct contradiction to ordinary website trust expectations and supports a critical risk posture for sensitive interactions. Behavioral testing also produced failed runs, entirely synthetic responses, and a corrected suspicious-network signal, although no wallet-drainer, clipboard-hijacking, hidden-form, or external-post activity was observed in the captured tests. The absence of those specific behaviors does not offset the confirmed external threat detections.

EVIDENCE

- External reputation telemetry recorded 17 malicious and 2 suspicious detections among 24 evaluated results, with Fortinet, Kaspersky, and Sophos among the flagging providers.
- The domain registration record shows creation on 2012-06-08, making it approximately 14.21 years old.
- Behavioral testing recorded 2 runs, 2 failed runs, and a 100.0% synthetic-response ratio.

Regulatory Verification Notes

The available record does not independently verify the operator's real-world identity, and the site's legal and regulatory disclosure state is unclear. The registered name is a healthcare-related corporate name, but that registration detail alone does not establish that the present website is operated by the named entity or that any activity conducted through it is licensed. No third-party broker-dataset match was identified; this is contextual only and is not a licensing determination. The site's valid transport encryption and identifiable hosting infrastructure are technical properties, not evidence of regulatory authorization.

EVIDENCE

- The registration record identifies the owner as Policlínica do Rio Vermelho LTDA.
- The site is served from AS28299 (LWSA S/A, BR), registered through LACNIC.
- The TLS certificate is DV, issued by YR2, and valid to 2026-11-05.
- No regulatory source or verified licensing record is identified in the supplied evidence.

What to Verify Next

Before any sensitive interaction, an independent authority should confirm whether the named legal entity actually controls this domain and whether the intended service, if any, requires authorization. Contact details and official support channels should be validated through an independently obtained source rather than relying solely on information presented by the website. Pending those checks, activity should remain limited to non-sensitive observation; login, credential submission, and financial activity should not be undertaken.

EVIDENCE

- Identity verification is recorded as unknown, with no independent linkage between the domain and a verified real-world operator.
- The site's apparent business model and regulated activity cannot be established from the supplied page record.
- The authoritative assessment identifies external threat detections as the decisive reason that infrastructure protections cannot offset the reputation risk.

Summary Verdict

The website has a critical trust posture and should be treated as unsuitable for sensitive interaction. The evidence convergence supports a clearly cautionary assessment, while the operator's real-world identity remains unverified.

Infrastructure Integrity

The domain resolves directly to hosting infrastructure associated with AS28299 (LWSA S/A, Brazil), with two likely origin addresses and no detected CDN or WAF edge layer. This provides no meaningful protective-infrastructure mitigation against the externally reported reputation risk.

Closing Assessment

Enterprise users should isolate the domain from credentialed and financial workflows and escalate any required engagement for independent security, ownership, and authorization review before permitting access.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNKNOWN
Identity score	50/100
Identity verification confidence	30%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of policlinicariovermelho.com.br.

- DNS for this domain is served by hoomhost.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-08. CLEAR
- The earliest public archive of this site is from 2013-09-28. CLEAR
- It is hosted on AS28299, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about policlinicariovermelho.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
