- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Polskie Radio is a public broadcasting website presenting podcasts, live radio streams, editorial programming, audiobooks, cultural and news content across multiple channels, together with links to mobile applications and social profiles; its apparent model is content distribution supported by public funding, sponsorship, advertising and promoted content rather than user deposits or investment activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent public-media purpose, with no investment, cryptocurrency, deposit-taking or other abuse-oriented mechanics, and the available page analysis found no phishing indicators, brand impersonation, malicious scripts or sensitive forms. Independent reputation checks returned no malicious or suspicious findings, while the site's established public presence and continuous historical record are consistent with an apparently legitimate website. The real-world operator identity remains likely rather than independently verified, so the legitimacy conclusion is evidence-consistent rather than proven.

EVIDENCE

- Homepage: editorial categories, live radio programming, podcasts and audio/video content are presented without investment or deposit functionality.
- Homepage: no login form, hidden form, sensitive form, wallet connection or wallet-drainer behavior was detected.
- Domain registration: registered 2002-01-17 and approximately 24.58 years old.
- Web archive: 5,000 snapshots spanning 2002–2021, covering 20 years with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The presented activity is media broadcasting rather than a financial service, and no financial license is claimed in the available site evidence. The homepage identifies the service through its Polskie Radio branding and links to multiple established social platforms, but the supplied material does not independently verify the real-world operating entity or establish formal corporate and regulatory particulars. This is a verification point for institutional onboarding, not evidence of scam activity. No broker-dataset match or other third-party reputational warning was identified.

EVIDENCE

- Hosting infrastructure: served from AS25523, Polskie Radio SA w Likwidacji, PL; registrar recorded as nazwa.pl sp. z o.o.
- Transport encryption: GeoTrust TLS RSA CA G1 issued an OV certificate for POLSKIE RADIO - SPÓŁKA AKCYJNA W LIKWIDACJI, valid to 2027-01-06.
- Homepage: the visible business model is public broadcasting with sponsorship and advertising, not regulated investment or payment services.

What to Verify Next

For credential or payment-related interaction, independently match the operator and official contact details against an authoritative public source, confirm any applicable corporate or broadcasting status through the relevant registry, and review the applicable privacy, terms, returns and payment-protection arrangements before relying on a transaction or subscription. Independent confirmation is particularly appropriate because the available evidence connects the site to its apparent brand with high but not conclusive confidence.

EVIDENCE

- Identity assessment: the operator connection is classified as likely rather than verified.
- Homepage: the available page evidence does not present a claimed financial license or license number.
- Site presentation: the service provides links to external social profiles that can be compared with independently sourced official channels.

Summary Verdict

The website has a **high-trust, low-risk posture** and is apparently legitimate on the available evidence. Its content, technical stability, reputation and long-established presence converge on an established site, while the operator's real-world identity remains not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Polskie Radio SA w Likwidacji in Poland, with no CDN detected and a likely origin address visible. This is a conventional, attributable hosting posture rather than an anonymized edge-only arrangement; the hosting association is a mitigating technical signal, not proof of legitimacy.

Closing Assessment

Normal content consumption is proportionate to the evidence; before entering credentials or making any payment, ordinary independent checks of operator identity, applicable terms and payment protection should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of polskieradio.pl.

- The request stayed on polskieradio.pl. It was not redirected to another domain. CLEAR
- Registration is published under nazwa.pl sp. z o.o.. CLEAR
- DNS for this domain is served by polskieradio.pl, across 2 name servers. NOTED
- The registration is paid up to 2027-01-16. NOTED
- The earliest public archive of this site is from 2002-07-27. CLEAR
- It is hosted on PR-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about polskieradio.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
