

Is polybutyleneflorida.com a scam? TrustSniffer's high-risk assessment: 0/100

polybutyleneflorida.com

Verdict

0

OUT OF 100

CRITICAL RISK

polybutyleneflorida.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A generic 'Website coming soon' hosting placeholder page from InMotion Hosting with links to hosting products and control panel; no active services, forms, or transactional elements present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	15 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	18 years old Registered history	CLEAR
Web archive	Archived since 2009 Public history exists	CLEAR

The page as captured

<https://polybutyleneflorida.com/>

What polybutyleneflorida.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This domain currently presents a generic "Website coming soon" hosting placeholder supplied by InMotion Hosting rather than an operating business website. It displays hosting-product links, support resources, control-panel and webmail access, but no active services, transactions, forms, or identifiable commercial purpose beyond indicating that a site may later be deployed.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material scam and impersonation concern, even though the currently displayed page is inert and contains no apparent phishing form, brand impersonation, or conflicting legal-entity names. The page-level content is therefore not itself evidence of an active scam mechanism, but the external detections are sufficiently serious that the domain should not be treated as trustworthy for sensitive interaction. The available evidence supports a clearly cautionary posture, with the blacklist signal taking precedence over the benign placeholder content.

EVIDENCE

- External reputation assessment recorded 15 malicious detections and identified Fortinet and Sophos among the flagging security vendors.
- The domain was recorded as blacklisted by two external reputation sources.
- Homepage analysis found a “Website coming soon” placeholder with no login form, sensitive form, transaction flow, or active service.

Regulatory Verification Notes

The site does not present an operating legal or regulated business, and no license claim, licensing authority, or registration number is disclosed on the available page. Its apparent association with InMotion Hosting describes the hosting environment, not the real-world operator of the domain; independent identity verification remains unavailable. The long registration period and use of a mainstream registrar are administrative continuity signals, but they do not establish the identity or regulatory standing of an operator.

EVIDENCE

- Domain registration: 2008-07-25, approximately 18.08 years old; registrar: GoDaddy.com, LLC.
- The homepage identifies an InMotion Hosting network placeholder and provides hosting-related links rather than legal-entity or regulatory disclosures.
- TLS certificate: issuer YR2, DV validation, valid to 2026-10-19.
- The site's transport encryption is present, but certificate validation is domain-level rather than organizational.

What to Verify Next

Before any sensitive interaction, an institution should independently identify the intended operator through authoritative corporate records and confirm any applicable licensing directly with the relevant regulator. Official support and contact channels should be validated through an independent, offline route rather than relying solely on links presented by the domain. Until those checks succeed and the blacklist status is resolved through the responsible security and domain-reputation channels, access should remain limited to non-sensitive observation.

EVIDENCE

- Homepage status: “Website coming soon”; no active commercial service is available for direct validation.
- The displayed page provides hosting support, control-panel, and webmail links, but no operator verification workflow.
- No license authority or license number is presented on the available site content.

Summary Verdict

The overall posture is **critical trust risk**, and the domain is unsuitable for login, credential submission, financial activity, or other sensitive interaction. The available evidence does not support treating it as an established or independently verified counterparty.

Infrastructure Integrity

The domain resolves directly to InMotion Hosting infrastructure in the United States, without a detected CDN or WAF layer and with one likely origin address. This provides identifiable hosting context but no meaningful protective edge layer capable of offsetting the external reputation concern.

EVIDENCE

- Hosted on AS54641, IMH-IAD – InMotion Hosting, Inc., US.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN or WAF vendor was detected.

Closing Assessment

The domain should not be used for credentials, account access, payments, or other financial actions; any future engagement should wait until independent operator, regulatory, and reputation checks produce satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of polybutyleneflorida.com.

- The request stayed on polybutyleneflorida.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by inmotionhosting.com, across 2 name servers. NOTED
- The registration is paid up to 2028-07-25. CLEAR
- The earliest public archive of this site is from 2009-12-04. CLEAR
- It is hosted on IMH-IAD, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about polybutyleneflorida.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
