

Is poolinmobiliario.com a scam? TrustSniffer's high-risk assessment:
0/100

poolinmobiliario.com

Verdict

0

OUT OF 100

CRITICAL RISK

poolinmobiliario.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language real-estate site "POOLINMOBILIARIO" listing properties for sale and rent across Mexican locations, providing filters, featured listings and agent contact details. Includes login and search forms.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What poolinmobiliario.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

POOLINMOBILIARIO is a Spanish-language real-estate marketplace presenting properties for sale and rent across Mexican locations, with searchable listings, featured properties, filters, agent contact options, and account-login functionality; its apparent business model is to connect buyers and renters with agents and property advertisers.

Scam/Impersonation Risk

The site's normal-looking real-estate content and absence of obvious page-level phishing indicators are materially outweighed by confirmed external threat detections. The domain is **blacklisted** by multiple external sources, with malicious and suspicious classifications recorded, creating a direct contradiction between the site's benign marketplace presentation and its external reputation. The available evidence does not establish brand impersonation, but the confirmed threat detections make login, credential submission, property enquiries, and any financial interaction inappropriate without independent validation. The domain's established registration period does not neutralize the external security findings.

EVIDENCE

- External reputation telemetry recorded 10 malicious detections and 2 suspicious detections, including Tier-1 detections from two security vendors; the domain was also recorded on an external blacklist.
- The homepage presents a coherent Mexican property marketplace with listings, locations, prices, and agent-contact functionality, but this content does not explain the external malicious classifications.
- The domain was registered on 2016-07-13 and has a recorded age of 10.11 years.

Regulatory Verification Notes

The site presents a property-listing and lead-generation model, but the supplied content contains no claimed license, registration number, or clearly identified regulatory authority. This is a transparency and verification gap rather than, by itself, proof of fraud. Operator identity remains independently unverified, and the external blacklist and malicious-detection findings should be treated as the controlling reputational concern. The site's transport and hosting telemetry confirms a functioning web service, but neither TLS nor hosting arrangements establish legal ownership or regulatory standing.

EVIDENCE

- The homepage title and content identify "POOLINMOBILIARIO" and display property-sale and rental activity in Mexico; no license or registration-number claim is present in the supplied business-model evidence.
- The site is hosted on AS46606, Unified Layer, US.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid through 2026-10-30.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the legal operator, the relevant agent or agency, and the ownership and availability of any advertised property through authoritative Mexican records or an offline contact route. Any proposed deposit, commission, rental payment, or document exchange should be routed only through independently confirmed payment-protection or escrow arrangements. Login credentials should not be reused on this site, and contact channels should be confirmed through an independent route before engagement.

EVIDENCE

- The homepage provides property listings, agent contact options, and a login flow, so operator and agent identity should be validated separately from the website.
- The supplied site content includes property prices and sale/rental enquiries but does not itself establish title, agency authority, or payment protection.
- Independent validation is particularly necessary because the domain has confirmed external malicious and blacklist detections.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction on the evidence available. Although the website appears operational and presents a plausible real-estate marketplace, the confirmed external security

contradictions prevent the site from being treated as trustworthy for credentials, financial activity, or high-value property engagement.

Infrastructure Integrity

The site resolves directly to a single likely origin IP, with no trusted CDN or WAF identified. Direct hosting does not itself establish maliciousness, but it provides no significant protective-infrastructure mitigation against the confirmed reputation concerns.

EVIDENCE

- The infrastructure resolves to one IP address, 162.214.67.3, classified as a likely origin; no CDN or WAF vendor was detected.
- Hosting infrastructure is registered in the United States and is provided by Unified Layer under AS46606.

Closing Assessment

Engagement should remain limited to non-sensitive observation until the operator, agents, property representations, and payment arrangements have been independently validated; credentials or funds should not be provided while the external security findings remain unresolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of poolinmobiliario.com.

- The request stayed on poolinmobiliario.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Neubox Internet S.A. de C.V.. [CLEAR](#)
- DNS for this domain is served by hostingecd.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-07-13. [NOTED](#)
- The earliest public archive of this site is from 2014-12-17. [CLEAR](#)
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about poolinmobiliario.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
