

Is positivi-t.com a scam? TrustSniffer's high-risk assessment: 0/100

positivi-t.com

Verdict

0

OUT OF 100

CRITICAL RISK

positivi-t.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Coming Soon' landing page (positivi-t.com) stating the site is under construction. No links, forms, or contact details are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://positivi-t.com/>

What positivi-t.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal “Coming Soon” landing page for positivi-t.com, stating that it is under construction and asking visitors to check back for an update; it currently presents no identifiable operating model, transaction capability, or visitor-facing service.

Scam/Impersonation Risk

Confirmed blacklist and malicious-detection signals create a critical risk posture for sensitive interaction. Multiple external security providers identified the domain as malicious, including Fortinet, Kaspersky, and Sophos, and the domain is present on external blacklist sources. The site itself does not display a login, payment mechanism, financial offer, or impersonated brand, so no site-level impersonation or identity contradiction was observed; however, the absence of active functionality does not neutralize the external threat evidence. The separate abuse-report signal concerns shared Squarespace infrastructure and therefore is not conclusive attribution to this domain, but it remains an adverse contextual indicator rather than a clean finding. The published page also provides too little substance to establish legitimate purpose or operator identity.

EVIDENCE

- The homepage is a 90-character “Coming Soon” / “We’re under construction” page with no forms, links, contact details, login workflow, or financial functionality.
- External detection recorded 15 malicious and 1 suspicious result, with Fortinet, Kaspersky, and Sophos among the flagged providers; blacklist status is confirmed by two external sources.
- The domain-registration record shows creation on 2025-11-11 and an age of 0.77 years; historical archive records show 20 snapshots with coverage spanning 2013-06-16 to 2019-06-04 across 7 tracked years.

Regulatory Verification Notes

The available site content does not claim a license, identify a regulated entity, or provide legal, ownership, or compliance disclosures. This is a material transparency gap for any future service that might solicit funds, credentials, investments, or other regulated activity, but it is distinct from the confirmed external threat detections. The real-world operator remains unverified. The domain is registered through Squarespace Domains II LLC, while the page provides no independent corporate or regulatory linkage. A third-party broker dataset produced no match; that result is contextual only and does not establish licensing or regulatory standing.

EVIDENCE

- The homepage contains no legal, licensing, registration, terms, privacy, or corporate-identity disclosure.
- The site is served from AS53831, identified as SQUARESPACE — Squarespace, Inc., US.
- The transport certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-10-07T11:43:19+00:00.
- The domain registrar is Squarespace Domains II LLC.

What to Verify Next

Before any future interaction becomes available, an independent check should confirm the operator’s legal identity and any claimed authorization directly with the relevant corporate or financial regulator registry. Any future terms, privacy, contact, payment, or account pages should be assessed for consistency with that identity, and official contact channels should be confirmed through an independently sourced route rather than relying solely on information introduced by the website. Until those checks produce consistent results and the external detections are resolved, account access, credential submission, and financial activity should not proceed.

EVIDENCE

- The current homepage supplies no operator, service, or contact information against which an independent verification can be performed.
- No login, signup, payment, wallet, or other sensitive-action workflow was exposed during page and interaction testing.
- Behavioral testing completed 2 successful runs and recorded 16 external XHR requests and 10 external POST requests, including 4 non-whitelisted XHR requests and 4 non-whitelisted POST requests.

Summary Verdict

The website has a critical trust posture and should not be treated as an established or verified service. The decisive concern is the convergence of confirmed malicious and blacklist detections with an unverified operator and an extremely limited public identity footprint. Current content does not demonstrate a legitimate business purpose sufficient to support sensitive engagement.

Infrastructure Integrity

The site resolves to Squarespace infrastructure in the United States on AS53831, with four likely origin IP candidates and no identified CDN edge IPs. Squarespace hosting and the presence of transport encryption are infrastructure facts only; they do not validate the operator or offset the adverse external reputation evidence.

Closing Assessment

The appropriate operational posture is passive viewing only until independent identity and authorization checks are completed and the external security detections are satisfactorily explained or cleared.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 34 reports on hosting IP 198.185.159.144 (Squarespace, Inc., Content Delivery Network), 31% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of positivi-t.com.

- The request stayed on positivi-t.com. It was not redirected to another domain. CLEAR
- Registration is published under Squarespace Domains II LLC. CLEAR
- DNS for this domain is served by googledomains.com, across 4 name servers. NOTED
- The registration is paid up to 2026-11-11. NOTED
- The earliest public archive of this site is from 2013-06-16. CLEAR
- It is hosted on SQUARESPACE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about positivi-t.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
