

Is posix.co.za legit? TrustSniffer's high-trust assessment: 90/100

posix.co.za

Verdict

90

OUT OF 100

HIGH TRUST

posix.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Simple site for Posix Systems under reconstruction. Provides phone, WhatsApp, email, physical address, and links to related DNS/hosting resources and ISPA contact for takedown notices.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Posix Systems is a South African corporate/contact website for domain, email, web-hosting, DNS, and related technical consultancy services. It presents a simple site under reconstruction, directing visitors to associated resources for secondary DNS, DNSSEC, TSIG, fibre information, and domain research, with the apparent purpose of providing service information and contact channels rather than facilitating direct online transactions.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a consistent corporate identity and service profile, with no detected impersonation, phishing, malicious-content, or suspicious transaction pattern. The site has no login form, sensitive form, wallet-connection flow, or externally submitted password form, and its observed browser behavior showed no suspicious scripts, cloaking, clipboard activity, or external network requests. External reputation checks were clean, and the site has an established global web presence. These signals support an apparently legitimate, low-risk website, although they do not independently prove the real-world operator's identity.

EVIDENCE

- Domain registration record: registered 1994-12-31T22:00:00Z and approximately 31.64 years old.
- Web archive: 318 snapshots spanning 1996-12-21 to 2026-05-08, covering 31 years with a maximum recorded gap of 1 year.
- Homepage behavior: no login form, hidden form, sensitive form, wallet-provider detection, suspicious inline script, cloaking, or clipboard-write activity.
- External reputation: 0 malicious and 0 suspicious detections, with no Google Safe Browsing malicious result, blacklist match, or reported abuse activity.

Regulatory Verification Notes

The site identifies Posix Systems as a provider of infrastructure and consultancy services and states that it is a member of ISPA, follows the ISPA Code of Conduct, and maintains acceptable-use, fair-use, and conditions-of-use policies. It also identifies ISPA as the nominated agent for receiving takedown notifications under section 75 of the Electronic Communications and Transactions Act. No specific financial-services license or regulatory authorization is presented; for the services described, this is a disclosure and verification point rather than evidence of impersonation or fraud. The available evidence is consistent with an established site, while independent operator identity remains unverified.

EVIDENCE

- Homepage legal and policy content: ISPA membership, Code of Conduct reference, Acceptable Use Policy, Fair Use Policy, and Conditions of Use.
- Homepage regulatory-contact content: ISPA is identified as the takedown-notice agent, with an ISPA complaints telephone number and email address.
- Transport encryption: TLS certificate issued by YR1, validation level DV, valid to 2026-09-15T23:22:17+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant or service-provider identity through an offline or independently sourced contact route, review the applicable service terms and refund or cancellation arrangements, and confirm any sector-specific authorization with the relevant registry if the proposed engagement involves regulated activities. Payment-protection controls should be checked before any prepayment or recurring arrangement.

EVIDENCE

- The homepage is primarily informational and contact-oriented, with no direct payment or account-creation form observed.
- The site links to separate service resources rather than presenting a consolidated online transaction workflow.
- The published policy and takedown-contact material provides defined subjects for independent confirmation before a commercial engagement.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradiction. The classification is strong, but it should not be treated as independent proof of the operator's real-world identity.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Posix Systems (Pty) Ltd in South Africa, with no CDN or WAF edge layer detected and two likely origin addresses. Confirmed technical evidence places the service on AS6083, registered through AFRINIC; the direct hosting arrangement is a normal infrastructure characteristic and does not, on its own, indicate elevated risk.

Closing Assessment

Normal browsing is proportionate to the observed posture; credential or payment use should follow ordinary independent checks of the contracting entity, applicable terms, and payment protections.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of `posix.co.za`.

- The request stayed on `posix.co.za`. It was not redirected to another domain. CLEAR
- Registration is published under Posix Systems. CLEAR
- DNS for this domain is served by `co.za`, across 4 name servers. NOTED
- The registration is paid up to 2028-12-31. CLEAR
- The earliest public archive of this site is from 1996-12-21. CLEAR
- It is hosted on Posix Systems (Pty) Ltd, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `posix.co.za` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
