Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

POSTA México is an established Spanish-language news portal providing national and regional reporting on Mexican politics, public safety, sports, entertainment, international affairs, education, community matters, and opinion, with an audience-supported model likely supplemented by advertising or media partnerships.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The homepage presents a coherent editorial identity, and the domain's long registration history and continuous archival record strongly support provenance rather than recent creation or suspicious repurposing. Automated interaction testing found no login form, hidden form, credential forwarding, wallet activity, clipboard interference, or cloaking. Some outbound network activity occurred during testing, but it did not coincide with deceptive page behavior and does not alter the legitimate-site assessment.

- The homepage identifies itself as POSTA México and consistently presents current news and editorial content across national and regional sections.
- The domain was registered on 27 June 2014 and is approximately 12.11 years old; registration is held through AKKY ONLINE SOLUTIONS, S.A. DE C.V.
- The web archive contains 738 snapshots from 28 January 2015 through 29 July 2026, spanning 12 tracked years, with no detected semantic repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no reported abuse, and an established top-one-million traffic position at rank 164,956.

Regulatory Verification Notes

POSTA México operates as a news and media publisher rather than a financial, investment, or other activity for which the supplied evidence indicates a specialized operating licence. The homepage identifies Klave Media S.A.P.I. de C.V. as the rights holder and references contact and privacy information, providing a concrete corporate attribution. It also discloses the use of artificial intelligence for a supplemental content-summary feature. No conflicting legal-entity names were identified; the available evidence nevertheless does not establish the full content of separate legal, privacy, or editorial-governance pages.

- The homepage copyright disclosure names Klave Media S.A.P.I. de C.V. as the rights holder.
- The homepage references privacy and contact resources and expressly discloses AI-assisted supplemental summaries.

- The homepage contains no financial-service offering or licensing claim requiring reconciliation with a financial regulator.
- Independent page-authority data places the domain in a mid-level authority band, supporting established visibility without determining legal status.

What to Verify Next

For institutional reliance, the legal entity named in the site footer should be matched to the contracting party on any advertising, syndication, subscription, or data-processing agreement. Relevant privacy terms, editorial policies, correction practices, and the treatment of AI-assisted summaries should be reviewed for the intended use. Official commercial and editorial contact channels should also be confirmed through the site’s published contact resources.

- The observed homepage covers ten identifiable editorial topic areas and contains substantial publication content.
- The page presented no sensitive form or account-authentication workflow during testing.
- The site states that artificial intelligence is used for a supplemental summarization function, making the associated editorial controls relevant to content-reliance decisions.

Summary Verdict

The website is legitimate, established, and trustworthy. Its stable identity, mature provenance, coherent publishing activity, clean security reputation, and identifiable corporate attribution converge strongly, with no contradictory risk signals. Normal browsing, account login where offered, and standard use are appropriate.

Infrastructure Integrity

The site is served from AS13335 by Cloudflare, Inc. in the United States and uses Cloudflare’s CDN/WAF, with all four observed addresses belonging to edge infrastructure. The origin server was consequently shielded from direct observation, which is normal for this architecture and reduces direct exposure but is not independently proof of legitimacy. Transport encryption is active through a domain-validated certificate.

- Hosting infrastructure is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Four Cloudflare edge addresses were observed, with no origin-server candidate exposed.
- The TLS certificate was issued by WE1 with DV validation and is valid until 14 September 2026.

Closing Assessment

Prospective users and enterprise counterparties may engage normally, applying ordinary contractual and content-governance due diligence where a formal commercial relationship or material reliance on published information is contemplated.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of posta.com.mx.

- The request stayed on posta.com.mx. It was not redirected to another domain. [CLEAR](#)
- Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2031-06-27. [CLEAR](#)
- The earliest public archive of this site is from 2015-01-28. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about posta.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
