- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

posta.com.tr is a Turkish news and media portal presented under the Posta Gazetesi name, offering extensive editorial coverage of breaking news, politics, economy, sports, health, lifestyle, entertainment, astrology, local news and related features. Its apparent business model is advertising-supported publishing, potentially supplemented by sponsored content, subscriptions or partnerships, rather than financial services or transactional activity.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents ordinary editorial content and does not request financial transactions, collect credentials through a visible form, or display cryptocurrency, investment, phishing or impersonation indicators. External reputation checks recorded no malicious or suspicious detections, and the historical record shows continuity rather than suspicious repurposing. Some browsing activity involved external requests and network destinations outside expected allowlists, but the same assessment found no cloaking, hidden forms, wallet activity, clipboard manipulation or credential submission behavior; this is more consistent with the advertising and analytics profile of a large content portal than with an abuse pattern.

EVIDENCE

- The homepage is classified as a news/media portal with no red flags, no sensitive form, no login form and no suspected brand impersonation.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections and no external blacklist hit for the domain.
- The domain was registered on 1996-02-27 and is approximately 30.47 years old.
- The archive contains 5,000 snapshots spanning 2001-02-04 to 2018-01-13, covering 18 tracked years.

Regulatory Verification Notes

The site appears to operate as an editorial publisher rather than a regulated financial service, and no financial product or regulated investment offering was identified on the reviewed homepage. The real-world operator identity is not independently verified by the supplied evidence, so the site's apparent legitimacy should not be treated as proof of a specific corporate or individual operator. The homepage navigation includes publisher-oriented sections such as Künye, İletişim, Bize Ulaşın and Reklam Bilgileri; these provide appropriate places for ordinary publisher and contact verification, while the available evidence does not establish a licensing status.

EVIDENCE

- The homepage identifies the service as “Posta Gazetesi” and provides editorial sections covering news, economy, sports, health, lifestyle and entertainment.
- Hosting resolved through AS12978, operated by DSMART - ANDROMEDA TV DIGITAL PLATFORM ISLETMECILIGI A.S., TR.
- The site's TLS certificate is Domain Validated (DV), issued by GlobalSign GCC R6 AlphaSSL CA 2025, and valid to 2027-03-13.
- The homepage navigation exposes Künye, İletişim, Bize Ulaşın and Reklam Bilgileri pages for publisher and contact disclosures.

What to Verify Next

Before credential or payment interactions, an organization should independently match the publisher information in the site's Künye and contact materials with authoritative company or publisher records, using a separately sourced contact route where practical. Any account activity should use the exact intended domain and standard payment protections; where a commercial subscription or other paid service is offered, its terms, cancellation process and applicable consumer protections should be checked before payment.

EVIDENCE

- The homepage contains a visible Giriş link, but the captured page contained no login form or sensitive submission form.
- The reviewed content describes editorial publishing and advertising-supported activity, not a financial transaction or investment service.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. The classification is strong, but it does not independently verify the real-world operator identity.

Infrastructure Integrity

The site resolves directly to a single IP address associated with AS12978 and the DSMART hosting organization in Turkey; no CDN or WAF vendor was detected in the supplied infrastructure facts. The direct hosting arrangement is technically attributable and does not itself indicate malicious activity, although protective edge-layer controls should not be inferred from the available data.

Closing Assessment

Normal editorial browsing is proportionate to the observed posture; independent publisher-identity, applicable commercial terms and payment-protection checks should be completed before submitting credentials or making a payment.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of posta.com.tr.

- The request stayed on posta.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-42.org. NOTED
- The registration is paid up to 2030-02-26. CLEAR
- The earliest public archive of this site is from 2001-02-04. CLEAR
- It is hosted on DSMART, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about posta.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
