Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a German e-commerce storefront for designing and purchasing personalized photo products, including wall art, photo books, prints, calendars, cards, mugs, and gifts, with revenue generated through direct retail sales and promotional offers.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, or other fraud indicators were observed. The homepage presents a coherent retail journey with product categories, pricing, account and order-management functions, customer-service resources, and conventional discount promotions. Its external reputation is clean across the evaluated threat-intelligence sources, and its established global traffic footprint further supports the conclusion that this is a legitimate commercial website.

- The homepage clearly identifies itself as a personalized-photo-products store and provides ordinary retail functions such as a shopping cart, account area, order status, and saved projects.
- Reputation screening recorded 0 malicious and 0 suspicious classifications, no malicious safe-browsing finding, no abuse reports, and no signature matches.
- The domain holds a global traffic rank of 58,201, placing it within the top one million websites.
- Interactive testing found no cloaking, hidden forms, external password forms, clipboard hijacking, wallet access, or credential-draining behavior.

Regulatory Verification Notes

The business model is conventional retail rather than a regulated financial or investment service, so the absence of a financial-services licence claim is not adverse. The homepage exposes links to legal policies and customer-service material, but the supplied evidence does not include the underlying legal-page text; consequently, no specific legal entity, registration identifier, consumer-law disclosure, or contractual term can be assessed from this record. This is a limited documentary-review boundary, not evidence of deceptive identity or deficient governance.

- The homepage provides customer-service, contact, business-customer, and legal-policy navigation within the retail interface.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's transport encryption uses a DV TLS certificate issued by Amazon RSA 2048 M04, valid to 2027-02-15.
- No broker profile was matched in the available third-party broker context; this has no material regulatory significance for a photo-products retailer.

What to Verify Next

For procurement, high-value orders, or enterprise onboarding, the legal notice and contractual pages should be checked for the contracting entity, registered address, applicable law, cancellation rights, returns process, delivery commitments, and data-processing terms. Payment instructions should be confirmed within the normal checkout flow, and official contact channels should be independently confirmed where enhanced due diligence is required.

- The homepage advertises discounts of up to 55% on wall art and 25% on other products above a stated €40 purchase threshold, making the associated eligibility and expiry terms relevant to transaction review.
- The storefront offers mobile and desktop design applications through which customers can create photo books and other personalized products.
- Two homepage forms were identified as newsletter email-subscription forms; neither was classified as sensitive nor directed to an untrusted destination.
- Cookie controls disclose personalized-advertising cookies, while Adobe Analytics is present in the observed technology stack.

Summary Verdict

The website is a legitimate, established, and trustworthy e-commerce operation. Its coherent commercial identity, clean security reputation, stable behavior, meaningful traffic presence, and mature customer journey converge on a high-confidence assessment suitable for normal interaction.

Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure. All four observed addresses were CloudFront edge servers, with no origin candidate exposed during the assessment; this reduces direct origin exposure but is appropriately treated as a security control rather than independent proof of legitimacy.

Closing Assessment

Normal browsing, account login, ordering, and standard payment activity are appropriate, subject to ordinary e-commerce checks on transaction details and purchase terms.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of posterxxl.de.

- The request stayed on posterxxl.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-18.com, across 4 name servers. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about posterxxl.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
