

Is postetaliane.it a scam? TrustSniffer's high-risk assessment: 5/100

postetaliane.it

Verdict

5

OUT OF 100

CRITICAL RISK

postetaliane.it shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A short Italian welcome landing page with three lines of text and no links, forms, or visible functionality.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://postetaliane.it/>

Benvenuto nel sito!

Grazie per aver visitato la pagina.

What postetaliane.it served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a minimal Italian-language welcome landing page that presents only a short greeting —“Benvenuto nel sito!” and “Grazie per aver visitato la pagina”—with no visible links, forms, transactional features, or stated business model; it therefore appears to be an informational or placeholder site rather than an operational service.

Scam/Impersonation Risk

A confirmed blacklist finding and multiple malicious external detections create a material scam and impersonation risk, despite the absence of visible phishing mechanics on the captured page. The page contains no login form, payment flow, wallet connection, deceptive branding, or other active interaction surface, so the observed content does not itself demonstrate an active phishing operation. However, the external reputation contradiction is sufficiently significant that the site's benign, nearly empty presentation cannot be treated as a basis for trust. No separate identity contradiction or brand-impersonation indicator was observed.

EVIDENCE

- External reputation assessment records the domain as blacklisted, with malicious detections from multiple evaluated sources.
- The homepage contains approximately 65 characters of Italian welcome text and no links, forms, or visible functionality.
- Domain registration record: registered 2025 (~0.7 years old).
- Web-archive record: 0 snapshots, first seen 2026-01-31T22:21:17Z, last seen 2026-01-31T22:21:17Z, 1 year tracked.

Regulatory Verification Notes

The observed site does not provide visible company, licensing, registration, or service disclosures, and its landing page offers no route to legal or operational information. This is a material verification gap for any regulated, financial, commercial, or identity-sensitive engagement, although the absence of such disclosure alone is not proof of fraud. Registration records associate the domain with Rigatuso Elena and identify VHosting Solution S.r.l. as registrar, but the available evidence does not independently verify the real-world operator or any regulated authorization. The site's transport security is technically present, but domain-validated encryption confirms connection protection rather than organizational legitimacy.

EVIDENCE

- Registration record identifies VHosting Solution S.r.l. as registrar and Rigatuso Elena as the recorded registrant organization.
- Hosting telemetry: served from AS60798, ASSERVEREASY - Servereasy Srl, IT.
- TLS certificate: issued by YR1, DV validation, valid to 2026-11-01T22:52:23+00:00.
- The homepage contains no visible company name, license number, registration number, terms, or regulatory disclosure.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm the operator's legal identity and any claimed authorization through the relevant official registry, using contact details obtained outside the site where possible. The domain's external blacklist status should also be resolved and re-evaluated before access is permitted beyond passive viewing. Any future request for credentials, payments, financial transfers, or identity documents should be accepted only after an independent business and channel-validation process.

EVIDENCE

- The landing page provides no legal or regulatory documentation from which an operator or authorization can be independently assessed.
- External reputation evidence records a confirmed blacklist condition requiring resolution before sensitive access.
- The observed page has no forms, login mechanism, payment function, or other workflow that can establish a legitimate operating relationship.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The available evidence does not establish a trustworthy operating identity, and the confirmed external reputation contradiction outweighs the site's limited benign technical and content characteristics.

Infrastructure Integrity

The site resolves directly to a single likely origin hosted by ASSERVEREASY - Servereasy Srl in Italy, with no detected CDN or WAF layer. This provides little protective separation between the public service and its hosting origin; the infrastructure should therefore be treated as a contextual risk factor rather than a legitimacy signal.

Closing Assessment

Restrict the site to passive observation and do not permit login, credential submission, financial activity, or disclosure of sensitive information unless independent identity, authorization, and reputation checks produce a satisfactory result.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of postetaliane.it.

- The request stayed on postetaliane.it. It was not redirected to another domain. [CLEAR](#)
- Registration is published under VHosting Solution S.r.l.. [CLEAR](#)
- DNS for this domain is served by vhosting-it.com. [NOTED](#)
- The registration is paid up to 2026-12-06. [NOTED](#)
- The earliest public archive of this site is from 2026-01-31. [CLEAR](#)
- It is hosted on ASSERVEREASY, from a server in IT. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about postetaliane.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
