

Is postex.pk legit? TrustSniffer's high-trust assessment: 100/100

postex.pk

Verdict

100

OUT OF 100

HIGH TRUST

postex.pk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-style PostEx landing page promoting logistics, cash-on-delivery fulfillment, payment infrastructure, business tools, and growth financing for e-commerce merchants, with a Pakistani phone number, support email, Lahore location, and links to terms and FAQs.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a corporate service platform for e-commerce merchants, presenting nationwide cash-on-delivery logistics, same-day delivery, instant upfront payments, growth financing, the XPay payment gateway, and business-account management tools. Its apparent business model combines logistics and payment-service fees with financing-related revenue from merchant customers.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam signals were observed. The domain has a sustained multi-year operating history, an established traffic footprint, and clean external threat-reputation results. Interactive testing also found no cloaking, hidden forms, credential diversion, suspicious scripts, clipboard interference, or cryptocurrency-wallet behavior.

- Domain-registration records show that postex.pk was registered in 2019 and is approximately 6.7 years old, with registration extending to 2029.
- Web-archive records contain 373 snapshots spanning 2020–2026, representing seven years of tracked history without detected semantic repurposing.
- External reputation checks recorded no malicious or suspicious detections, no threat-list findings, and no abuse reports; the domain held a global traffic rank of 77,685.
- The homepage was consistently available during two successful behavioral runs and displayed no phishing or deceptive interaction patterns.

Regulatory Verification Notes

The supplied homepage identifies the operating brand and provides a Lahore location, Pakistani telephone contact, formal support channel, and links to Terms of Service and FAQs. However, the available page content does not display a legal-entity name, corporate registration identifier, financing licence, licence number, financing terms, or named supervisory authority. This is a limited disclosure issue for institutional due diligence, not evidence of impersonation or illegitimacy.

- The homepage footer identifies PostEx, gives a Lahore, Punjab location, and publishes a Pakistani telephone number.
- The homepage provides links to Terms of Service and FAQs, but the contents of those documents were not supplied for assessment.

- The homepage describes access to growth capital but does not display a licence claim, regulatory authority, licence number, pricing, or financing conditions.
- The available landing-page content contains no conflicting legal-entity names or competing identity claims.

What to Verify Next

Before establishing an institutional relationship, the prospective contracting entity should be matched to the applicable Pakistani corporate registry and, where relevant, the authority governing its financing or payment activities. The full contractual documents should be reviewed for eligibility, pricing, settlement timing, recourse, data handling, dispute resolution, and governing law. Regional operations should be separately mapped to their responsible legal entities, and official contact channels should be confirmed through an independent business directory or registry record.

- The homepage links to separate United Arab Emirates and Saudi Arabian regional websites, making jurisdiction-specific entity mapping relevant.
- The site exposes Login, Signup, Get Started, and Track Order pathways, indicating operational account and transaction workflows.
- The homepage promotes instant funding and payment-on-delivery services, making contractual settlement and recourse provisions material to merchant onboarding.

Summary Verdict

The site presents as a legitimate, established, and trustworthy corporate platform. Its continuous provenance, clean security reputation, coherent commercial identity, and stable observed behavior converge on a high-confidence legitimacy assessment with no contradictory risk signals.

Infrastructure Integrity

The site uses Cloudflare’s mainstream CDN/WAF infrastructure. All four observed addresses were Cloudflare edge nodes, with no origin candidate exposed during the analysis; this reduces direct origin-server exposure but is a security mitigation rather than independent proof of business legitimacy. Transport encryption was valid and appropriately deployed.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- The site’s TLS certificate was issued by WE1 with domain validation and is valid until 2026-10-01.
- DNS resolution identified four Cloudflare edge addresses and no likely origin-server address.

Closing Assessment

Normal interaction, including account login, account operations, and standard use, is appropriate; institutional onboarding should proceed through ordinary legal, contractual, and counterparty due-diligence controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of postex.pk.

- The request stayed on postex.pk. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2029-11-24. [CLEAR](#)
- The earliest public archive of this site is from 2020-02-05. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about postex.pk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
