

Is posthaus.com.br legit? TrustSniffer's high-trust assessment: 100/100

posthaus.com.br

Verdict

100

OUT OF 100

HIGH TRUST

posthaus.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Retail homepage for Posthaus (Brazilian clothing retailer) listing product categories, brands, promotions, prices and company/contact details. Typical ecommerce content with newsletter signup and account/login entry point.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Brazilian online retail marketplace for apparel and related goods, presenting women's, men's, children's, plus-size, footwear, accessories, beauty, home, and pet categories alongside product prices, promotions, installment-payment offers, and standard shopping, account, and checkout functions.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-content, or suspicious-behavior findings. The homepage presents a coherent retail model rather than investment or cryptocurrency activity, with identifiable product categories, brands, prices, promotional discounts, shipping offers, and a conventional ecommerce checkout path. The site's technical age and clean external reputation further support an established, apparently legitimate presentation, although the real-world operator identity remains independently unverified. The homepage also contains no login form or hidden sensitive form, and observed behavior showed no wallet, clipboard-hijacking, cloaking, or external-post activity.

EVIDENCE

- Domain registration records show creation on 1996-01-24 and an age of 30.57 years.
- The homepage is categorized as ecommerce/retail and displays apparel categories, brands, prices, promotions, and checkout-oriented calls to action.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit for the domain.
- Homepage behavior testing recorded 0 external XHR requests, 0 non-whitelisted external posts, 0 wallet-connect runs, and 0 hidden forms across 2 successful runs.

Regulatory Verification Notes

The homepage presents company and contact details consistent with a functioning retail business, while the registration record identifies POSTHAUS LTDA. That information supports the site's apparent commercial identity but does not independently verify the real-world operator. No licensing claim or license number is identified in the supplied page evidence; for an apparel retailer this is principally a disclosure and merchant-verification matter rather than evidence of a scam. The site uses valid domain-validated transport encryption issued by a known certificate authority. No separate regulated-entity match was identified in the supplied third-party broker context.

EVIDENCE

- The homepage identifies the business as Posthaus and provides company/contact information.
- WHOIS records list POSTHAUS LTDA as the owner and an expiration date of 2030-01-24.
- The site's TLS certificate is DV-validated, issued by Go Daddy Secure Certificate Authority - G2, and valid to 2026-12-08.
- No license authority or license number is presented in the supplied business-model evidence.

What to Verify Next

Before credential or payment interactions, an independent check should confirm that the merchant identity used for the transaction matches the business information shown on the site. The legal and returns pages should be reviewed for delivery obligations, refund procedures, warranty handling, and applicable consumer protections. Payment should preferably use a method offering dispute or chargeback protection, and official support channels should be confirmed through an independent route before resolving account or order issues.

EVIDENCE

- The homepage provides the starting point for comparing the displayed merchant identity with independent business records.
- The site's stated business model includes direct sales, installment payments, promotions, and a standard ecommerce checkout.
- The homepage includes an account-entry link and newsletter signup, making independent confirmation of support and account-recovery channels relevant before sensitive use.

Summary Verdict

The website has a high-trust, low-risk posture and is consistent with an established, apparently legitimate ecommerce operation. The assessment supports normal browsing and ordinary retail use, but it should not be interpreted as independent proof of the operator's real-world identity.

Infrastructure Integrity

The supplied infrastructure mapping records direct Brazilian hosting on AS28343 (UNIFIQUE TELECOMUNICACOES S/A), with no detected CDN or WAF layer and two likely origin addresses; the technical sensor separately observed service on AS4230, operated by CLARO S.A. These hosting observations are infrastructure characteristics rather than indicators of maliciousness, and the deterministic assessment found no high-risk abuse pattern associated with them.

EVIDENCE

- Infrastructure mapping records AS28343 - UNIFIQUE TELECOMUNICACOES S/A, BR, with 2 unique IPs, 0 edge IPs, and 2 likely origin IPs.
- The technical sensor identified AS4230 - CLARO S.A., BR, at 200.245.254.78.
- CDN detection was false and trusted-CDN detection was false.

Closing Assessment

Proceed with ordinary use proportionately, completing the independent merchant-identity, returns-policy, and payment-protection checks described above before submitting credentials or payment information.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of posthaus.com.br.

- The request stayed on posthaus.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by net.br, across 2 name servers. NOTED
- The registration is paid up to 2030-01-24. CLEAR
- It is hosted on AS4230, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about posthaus.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
