Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Powerbuy.co.th is an established Thai ecommerce website offering branded consumer electronics, home appliances, computers, mobile devices, and related products through online retail and a network of 104 physical branches, supported by conventional pricing, discounts, coupons, memberships, and customer-service functions.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious behavior, or other fraud signals were observed. The site's long operating history, extensive archival record, stable retail identity, clean external reputation, and ordinary ecommerce mechanics strongly support its legitimacy. Its homepage presents recognizable branded merchandise with specific models, prices, promotional discounts, branch information, returns guidance, FAQs, and account services rather than deceptive investment, cryptocurrency, or credential-harvesting propositions.

- The homepage identifies the service as a consumer-electronics retailer and displays branded products, model-level descriptions, Thai-baht pricing, discounts, shopping functions, and customer-service links.
- The domain dates to 1999 and is approximately 26.8 years old.
- The domain has 401 archive snapshots spanning 1999–2019, representing 21 years of tracked history, with no detected suspicious repurposing or semantic drift.
- Reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no external threat-list hit, and no reported abusive activity for the observed infrastructure.

Regulatory Verification Notes

The website presents a coherent commercial identity as Power Buy and provides corporate details, branch information, returns resources, FAQs, and contact pathways appropriate to an established retailer. The organization-validated certificate identifies POWER BUY COMPANY LIMITED, materially reinforcing the relationship between the site and its stated commercial identity. As this is ordinary retail rather than a represented financial or investment service, no financial-services licensing claim is expected; the supplied page evidence does not establish the precise scope of any general corporate-registration disclosures, which is a minor documentation consideration rather than a legitimacy concern.

- The homepage describes 104 nationwide branches and provides links for contact, frequently asked questions, returns, membership access, and branch discovery.
- The site is registered through THNIC.

- The site is served from AS13335 (Cloudflare, Inc.).
- Transport encryption uses an OV certificate issued by Thawte TLS RSA CA G1 to POWER BUY COMPANY LIMITED, valid until 2027-01-20.

What to Verify Next

Enterprise onboarding or material procurement should confirm that the contracting entity, invoicing details, payment beneficiary, warranty terms, and returns conditions correspond to the corporate information presented through the site. Official customer-service channels and the relevant physical branch may also be confirmed independently for unusually large or non-standard orders.

- The homepage provides product-specific prices and promotional terms that can be reconciled with the final checkout and invoice before payment.
- The homepage exposes branch, contact, FAQ, and returns resources that support independent confirmation of order, warranty, and fulfilment arrangements.

Summary Verdict

The available evidence supports a confident assessment that this is a legitimate, established, and trustworthy retail website. Its identity, operating footprint, historical continuity, reputation, and commercial presentation converge without contradiction. Normal interaction, including account login, purchasing, and standard account activity, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN and WAF. The observed addresses—104.18.29.67 and 104.18.28.67—are edge servers, while the origin server was not exposed during the assessment; this reduces direct infrastructure exposure but is a protective control, not independent proof of legitimacy.

Closing Assessment

Prospective customers may use the website normally, applying standard transaction controls such as reviewing checkout totals, delivery terms, warranties, and beneficiary details before completing material purchases.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of powerbuy.co.th.

- The request stayed on powerbuy.co.th. It was not redirected to another domain. CLEAR
- Registration is published under THNIC. CLEAR
- DNS for this domain is served by azure-dns.info, across 4 name servers. NOTED
- The earliest public archive of this site is from 1999-10-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about powerbuy.co.th at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
