

Is powercoin.it legit? TrustSniffer's high-trust assessment: 100/100

powercoin.it

Verdict

100

OUT OF 100

HIGH TRUST

powercoin.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 60%.

What this site appears to be

A multilingual online store offering an extensive catalog of modern collectible coins, medals, bars, and themed precious-metal products. It displays prices, stock or pre-order status, expected availability dates, cart controls, worldwide-shipping messaging, and links to help, FAQ, blog, contact, and account sections. No explicit return guarantees, cryptocurrency deposits, sensitive credential requests, or other strong fraud indicators appear in the supplied content.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a multilingual ecommerce store selling modern collectible coins, medals, bars, and themed precious-metal products through ordinary retail purchases, with listed prices, availability information, pre-orders, shopping-cart functionality, international-shipping messaging, and customer-account access.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation signals were observed. The storefront presents a coherent retail model based on direct sales rather than investment returns or yield promises. Its long-established domain, sustained archival record, stable browser behavior, and clean external reputation collectively support the conclusion that it is a legitimate commercial website.

- The domain was registered on 9 January 2009 and is 17.56 years old; 129 archive snapshots span 22 April 2009 to 2 November 2017, covering 9 tracked years with no suspicious repurposing identified.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no external blacklist finding, and 0 abuse reports.
- The homepage displays a substantial, internally consistent catalog of collectible silver and gold products with ordinary prices, discounts, stock or pre-order status, and cart controls.
- Browser testing completed 2 of 2 runs successfully and found no cloaking, hidden forms, wallet-draining behavior, clipboard hijacking, suspicious inline scripts, or external password forms.

Regulatory Verification Notes

The available registration record identifies “power coin di antonello galletta” as the organization and Aruba S.p.A. as registrar, providing a concrete administrative link to the domain. The supplied homepage extract does not expose detailed legal, address, or fulfillment disclosures, and no licence claim or registration number is visible. Because the site operates as a conventional collectibles retailer rather than an investment or brokerage service, the absence of a financial-services licence claim is not inherently adverse; it is a limited disclosure-verification matter rather than evidence of deception. No matching third-party broker profile was identified, but that result carries no licensing or legal significance.

- The domain-registration record names “power coin di antonello galletta” as the organization, with Aruba S.p.A. as registrar and registration expiry on 9 January 2027.

- The hosting infrastructure serves the site from AS26347, operated by DREAMHOST-AS — New Dream Network, LLC, US.
- The site's transport encryption uses a valid domain-validated certificate issued by YR1, valid until 20 October 2026.
- The supplied homepage provides links to About Us, FAQ, Help, Blog, and Contact pages, although their detailed legal or policy content is not included in the available page extract.

What to Verify Next

Routine ecommerce due diligence should confirm the merchant's legal name, physical address, applicable return and cancellation terms, insured-shipping arrangements, and treatment of pre-order deposits. For higher-value numismatic purchases, product authenticity, metal specifications, issuing authority, edition limits, and delivery dates should be retained from the listing and order confirmation. Official customer-service channels should also be confirmed independently before resolving payment or fulfillment disputes.

- The homepage advertises both in-stock and pre-order merchandise, making cancellation, availability, and delivery terms relevant to purchase review.
- Product listings include collectible silver and gold items at materially varying retail prices, supporting item-level verification for higher-value orders.
- Worldwide-shipping messaging appears on the storefront, making destination coverage, insurance, customs charges, and loss allocation relevant transaction terms.
- The homepage includes account, cart, FAQ, Help, and Contact pathways consistent with a standard ecommerce customer journey.

Summary Verdict

The website has a high-trust, established posture supported by convergent identity, provenance, reputation, content, and behavioral evidence. It is assessed as a legitimate and trustworthy ecommerce operation, with no observed contradictions or substantive fraud indicators.

Infrastructure Integrity

The site is hosted directly on identified DreamHost infrastructure with valid TLS protection. These controls support transport and hosting integrity, although infrastructure alone is not treated as proof of business legitimacy.

Closing Assessment

Normal browsing, account login, and standard purchases are appropriate, subject to ordinary ecommerce review of order terms and product documentation.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of powercoin.it.

- The request stayed on powercoin.it. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Aruba s.p.a.. [CLEAR](#)
- DNS for this domain is served by dreamhost.com. [NOTED](#)
- The registration is paid up to 2027-01-09. [NOTED](#)
- The earliest public archive of this site is from 2009-04-22. [CLEAR](#)
- It is hosted on DREAMHOST-AS, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about powercoin.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
