## Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

This is a Thai corporate B2B website for Pranakorn Technology Enterprise Co.,Ltd., presenting Video-AI solutions, security hardware, industrial and medical inspection systems, smart-city and traffic technologies, logistics automation, and IT integration services for enterprise and public-sector customers.

### Scam/Impersonation Risk

No contradictions were observed across the supplied website, technical, behavioral, and external-reputation evidence. The homepage presents a coherent corporate technology-services model without deceptive financial, cryptocurrency, investment, or credential-harvesting features; testing also found no login form, sensitive form, cloaking, wallet activity, or suspicious scripts. Available external checks recorded no malicious or suspicious detections, and the historical record is consistent with continued operation rather than suspicious repurposing. The site therefore presents no current evidence of scam or brand impersonation, although the real-world operator identity remains independently unverified.

#### EVIDENCE

- The homepage identifies Pranakorn Technology Enterprise Co.,Ltd. and describes Video-AI, security, inspection, smart-city, and IT-service offerings.
- The domain was registered on 2017-01-19 and is approximately 9.59 years old.
- The historical record contains 93 snapshots spanning 2017–2026, with 10 years tracked.
- External checks recorded 0 malicious and 0 suspicious detections; no phishing or impersonation designation was present.

#### Regulatory Verification Notes

The available content is consistent with a commercial technology integrator rather than a financial or otherwise visibly regulated service. No licensing claim or registration number is presented in the supplied corporate content; this is a verification and disclosure item, not evidence of wrongdoing. The site identifies a corporate name and business model, while independent linkage to a real-world operator is not established. A separate page-authority signal is limited, but it does not contradict the substantive corporate presentation or the clean technical and reputational findings. The domain is administered through GoDaddy.com, LLC, and its transport encryption uses a valid DV certificate issued by YR1, expiring on 2026-11-11.

#### EVIDENCE

- The homepage title identifies “Pranakorn Technology Enterprise Co.,Ltd.” and the content describes enterprise security and Video-AI services.
- The domain registrar is GoDaddy.com, LLC; the listed registration organization is Domains By Proxy, LLC.
- TLS is valid, uses DV validation, is issued by YR1, and is valid through 2026-11-11.
- The reviewed corporate content contains no stated license authority or license number.

#### What to Verify Next

Before credential or payment interactions, the prospective counterparty should independently confirm the contracting entity through official corporate records or an independently obtained business contact. Where the engagement involves a regulated activity, the relevant licensing registry should be checked directly. Commercial terms, returns or service obligations, and payment-protection arrangements should be reviewed before funds or sensitive information are exchanged. Official contact channels should also be confirmed through an independent route rather than relying solely on website-provided details.

#### EVIDENCE

- The available identity evidence supports the stated corporate presentation but does not independently verify the real-world operator.
- The site's described B2B model makes counterparty, service-scope, and payment-term validation the relevant diligence path.
- No sensitive interaction form was detected during technical page and behavior testing.

Summary Verdict

The overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate corporate website, with no contradiction-based scam or impersonation concern observed. The principal qualification is that the operating entity has not been independently verified.

Infrastructure Integrity

The site resolves directly to a single hosting address, with no CDN detected. Hosting records place it on National Telecom Public Company Limited's Thai network; this is a conventional infrastructure arrangement and should be treated as a supporting technical signal rather than proof of legitimacy.

EVIDENCE

- Served from AS9335, National Telecom Public Company Limited, Thailand.
- The infrastructure record shows 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- CDN detection was false, while the site resolved successfully.

Closing Assessment

Proceed with ordinary business diligence, including independent counterparty confirmation and review of commercial and payment protections, before entering credentials or completing a payment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pranakorntech.com.

- The request stayed on pranakorntech.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by pathosting.com, across 2 name servers. NOTED
- The registration is paid up to 2028-01-19. CLEAR
- The earliest public archive of this site is from 2017-08-13. CLEAR
- It is hosted on NTPCL-AS-AP, from a server in TH. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about pranakorntech.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
