Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2013.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Press Start Australia is an Australian gaming media website presenting gaming news, reviews, bargains, competitions, features, interviews, and gaming-related product coverage for an Australian audience; its apparent business model is editorial publishing supported by advertising, sponsorships, affiliate or bargain links, and competitions.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents substantial, internally coherent editorial activity, including current gaming news, product reviews, Australian bargains, and features, with no deposit-taking, high-risk financial product, or sensitive credential form. The site's long-running historical presence and clean external reputation support an established identity rather than a deceptive or disposable operation.

- The homepage identifies the publication as “Press Start Australia” and contains current news, reviews, bargains, and gaming features.
- The domain was registered in 2013 and is approximately 13.45 years old.
- The archive contains 3,978 snapshots spanning 2013–2026, covering 14 years.
- External checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist match.

Regulatory Verification Notes

The site's activity is media publishing rather than a regulated financial service, and the supplied pages contain no claim that users are being offered a licensed financial product. The registration record names Southern Cross Austereo Pty Ltd and GoDaddy.com LLC trading as GoDaddy.com. A minor transparency point remains that no corporate registration number or sector-specific license number is presented in the supplied site evidence; this is a verification note, not evidence of deception. A separate broker-reputation dataset produced no match.

- The homepage describes gaming news, reviews, bargains, competitions, interviews, and product coverage rather than financial services.
- The registration record lists Southern Cross Austereo Pty Ltd as owner and GoDaddy.com LLC trading as GoDaddy.com as registrar.
- The site's page assessment classifies the business model as editorial/news media with no identified red flags.

- The registration record does not contain a sector-specific license number.

What to Verify Next

For institutional onboarding or commercial engagement, confirm the relevant publishing entity and any required business details through an independent corporate registry, and validate official contact channels through a separate trusted route. Routine site interaction and account login are proportionate to the site's established media function.

- The homepage provides the publication identity and editorial scope.
- The site's business model is described as advertising, sponsorship, affiliate or bargain links, and competitions.
- No sensitive form, password-external form, hidden form, or wallet-connection behavior was detected.

Summary Verdict

The website presents a legitimate, established, and trustworthy media presence with strong consistency between its identity, content, historical continuity, and technical observations. No evidence indicates scam activity, impersonation, phishing, or a materially unsafe interaction model.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on CDN edge servers and no origin candidates identified. This reduces direct exposure of the underlying hosting environment and is a positive mitigating control, although it is not independently determinative of legitimacy.

- Hosted on AS209242, operated by CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.
- Observed edge IPs were 141.193.213.10 and 141.193.213.11; both belong to AS209242.
- TLS uses issuer YE1 with DV validation and is valid to 2026-09-03.

Closing Assessment

Normal browsing, account login, and standard site use are appropriate; higher-value commercial engagements should follow the organisation’s ordinary independent business-verification procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of press-start.com.au.

- The request stayed on press-start.com.au. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about press-start.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
