Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established German business-news and press-release portal that provides searchable company stories, specialist articles, events, and job listings, while offering professional publishing, distribution, promotion, and analytics services to organizations and free content and subscriptions to readers.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other deceptive patterns were observed. Its long operating history, sustained public visibility, clean external reputation, and stable content-site behavior collectively support the conclusion that this is the authentic PresseBox service rather than a recently created imitation. Account and submission forms are consistent with the portal's stated publishing model.

- The domain was registered in 2001 and is approximately 24.67 years old.
- Public archives contain 5,000 snapshots from 29 November 2001 through 8 December 2025, spanning 25 tracked years without evidence of suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, and no reported abuse against the assessed infrastructure.
- The domain holds a global traffic rank of 55,129, placing it within the top one million sites.

Regulatory Verification Notes

The homepage identifies UNITED NEWS NETWORK GmbH as the portal operator and provides links to an imprint, contact information, terms, and privacy materials. This is coherent legal and operational disclosure for a press-release distribution and business-news service. No sector-specific licensing claim was identified, but such authorization is not inherently expected for the described publishing activity; organizations purchasing professional services should rely on the contractual entity and terms stated in the legal documentation.

- The homepage attributes operation of the service to UNITED NEWS NETWORK GmbH and exposes dedicated imprint, contact, terms, and privacy links.
- The site's transport encryption uses a domain-validated certificate issued by R12, valid until 18 August 2026.

- The assessed content presents the service as a news and public-relations publishing platform rather than as a licensed financial intermediary.
- The available third-party broker dataset contains no matching broker profile for the site, which provides no independent basis for a financial-regulatory conclusion.

What to Verify Next

Prospective commercial customers should confirm that quotations, invoices, and publishing agreements name the same operating company shown in the imprint, and should review the applicable submission, distribution, analytics, and data-processing terms before providing embargoed or commercially sensitive material. Official contact channels should be confirmed independently when establishing a new supplier relationship.

- The homepage exposes seven functional form categories: search, newsletter subscription, registration, password reset, login, press-release submission, and category-feed selection.
- Observed forms did not submit sensitive information to an untrusted destination, and no hidden forms or externally routed password forms were detected.
- The page indicates optional third-party data sharing through its consent-management controls.
- The site links to a Facebook presence, providing an additional public channel for basic brand-consistency checks.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, historical continuity, public reach, technical behavior, and external reputation converge consistently, with no contradictory evidence undermining that assessment.

Infrastructure Integrity

The service is protected by Cloudflare’s CDN/WAF, and all four observed IPv4 and IPv6 addresses were Cloudflare edge systems; no separate origin candidate appeared in the assessment. This architecture reduces direct exposure of the application host and is an appropriate mitigating security control, although protective infrastructure alone is not evidence of legitimacy.

- The site is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Four CDN edge addresses were observed: 104.20.18.165, 172.66.161.223, 2606:4700:10::6814:12a5, and 2606:4700:10::ac42:a1df.

Closing Assessment

Normal interaction with the website—including account login, registration, content submission, and standard use—is appropriate, subject to ordinary organizational procurement, privacy, and account-security controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pressebox.de.

- The request stayed on pressebox.de. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The earliest public archive of this site is from 2001-11-29. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pressebox.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
