Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PrestaShop Project is the official homepage for an open-source e-commerce platform, presenting software releases, documentation, developer resources, community channels, security information, and licensing details for merchants, integrators, and contributors.

Scam/Impersonation Risk

No contradictions were observed across the homepage, legal materials, and external reputation checks. The site presents a coherent open-source software purpose, links to established project channels such as GitHub, Slack, and YouTube, and shows no phishing, impersonation, malicious-content, or deceptive financial behavior. Its published content is consistent with a legitimate PrestaShop project rather than a site seeking sensitive financial interaction.

- The homepage identifies the PrestaShop Project and describes an open-source e-commerce platform.
- The homepage provides project documentation, releases, security information, GitHub resources, and community channels.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain was registered on 2021-05-11 and is approximately 5.23 years old.

Regulatory Verification Notes

The site operates as an open-source software project rather than presenting itself as a financial or investment service. Its pages include a legal notice, Creative Commons BY-SA 4.0 content licensing, and a statement that “PrestaShop” and its logos are international trademarks of PrestaShop SA. No financial-services license or registration number is presented; this is a limited disclosure point for organizational verification, not evidence of deceptive activity. No adverse broker-reputation match was identified.

- The homepage names PrestaShop SA in its trademark statement and links to legal and licensing information.
- The homepage states that content is distributed under the Creative Commons BY-SA 4.0 License.
- The domain registrar is SafeBrands SAS; registration expires on 2027-05-11.
- Hosted on AS13335, provided by CLOUDFLARENET - Cloudflare, Inc., US; TLS is issued by WE1 at DV validation level and is valid to 2026-10-20.

What to Verify Next

For organizational due diligence, confirm the project’s legal and trademark information through the legal notice and independently validate that software downloads and developer resources are reached through the project’s established channels. Where procurement or commercial deployment requires formal organizational documentation, obtain that documentation directly from the project’s official contacts.

- The homepage provides the legal notice, trademark statement, documentation, and download pathways.
- The homepage links to GitHub, Slack, and other project-community resources.
- The site identifies the software as freely available through GitHub.

Summary Verdict

The website has a high-trust posture and is consistent with an established, legitimate open-source software project. Its identity, purpose, content, reputation, and technical signals converge without observed contradiction. Normal interaction, including account login where applicable and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating at Cloudflare edge addresses and no origin candidates exposed in the analysis. This provides a meaningful layer of infrastructure protection, while remaining a mitigating control rather than proof of legitimacy.

Closing Assessment

Standard browsing, project participation, and ordinary software-related interaction are appropriate, subject to normal enterprise procurement and deployment controls.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of prestashop-project.org.

- The request stayed on prestashop-project.org. It was not redirected to another domain. CLEAR
- Registration is published under SafeBrands SAS. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-11. NOTED

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about prestashop-project.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
