

Is prestashop.com legit? TrustSniffer's high-trust assessment: 90/100

prestashop.com

Verdict

90

OUT OF 100

HIGH TRUST

prestashop.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official marketing/homepage for PrestaShop: describes the ecommerce platform, hosting options, marketplace for addons, payment integrations, services (experts/support), community and resources. Intended to convert visitors to users/customers and marketplace buyers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PrestaShop is an established ecommerce technology website presenting an open-source platform, hosted online-store plans, an addons and themes marketplace, payment integrations, professional services, support, and educational resources for businesses seeking to create and operate online shops.

Scam/Impersonation Risk

No contradictions were observed, including no evidence of phishing, brand impersonation, conflicting legal identities, or malicious external reputation findings. The homepage presents a coherent ecommerce software and services proposition rather than an abuse-oriented or deceptive offer, and the site's long-established registration, sustained historical presence, strong global traffic footprint, clean reputation checks, and established page authority converge on an apparently legitimate website. The real-world operator identity is not independently verified, so this conclusion remains evidence-consistent rather than proof of the operator's identity.

EVIDENCE

- Domain registration record: Registered 2007-04-11 (~19.35 years old); registrar SafeBrands SAS.
- Web archive record: 5,000 snapshots spanning 2007-10-11 to 2017-02-23 (11 years tracked).
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no confirmed external blocking finding.
- Established traffic footprint: rank 3635, within the top 1,000,000 sites.

Regulatory Verification Notes

The homepage describes a commercial software and services model involving open-source and hosted ecommerce offerings, marketplace modules and themes, professional assistance, and payment integrations. No regulated license claim or license number is established in the supplied page evidence; for this type of technology platform, that is a verification and disclosure point rather than evidence of a scam. The available evidence supports an established commercial site, while independent confirmation of the operating legal entity and any jurisdiction-specific obligations remains appropriate before contractual or payment commitments.

EVIDENCE

- Hosting record: Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Transport security: TLS certificate issued by WE1, validation level DV, valid to 2026-11-05.
- Homepage content: Identifies PrestaShop's hosted plans, marketplace, services, support, and payment-related offerings as its commercial activities.

What to Verify Next

Before credential or payment interactions, an independent check should match the operator named in the site's legal notice and terms with the relevant corporate records, and should confirm the applicable merchant, refund, subscription, and payment-protection arrangements. Where a regulated payment or other jurisdiction-specific service is being relied upon, the relevant registry should be checked for the responsible provider rather than assuming that the platform itself supplies regulatory coverage.

EVIDENCE

- The homepage is a conversion-oriented commercial site with hosted offerings, marketplace activity, and payment integrations, making merchant and payment-terms checks relevant.
- The available identity evidence is provisional rather than independently verified.
- The supplied page evidence does not establish a regulatory license number or regulator attribution.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a **high-trust, low-risk posture**. No scam or impersonation contradiction was identified, but the operator's real-world identity should not be treated as independently proven.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and WAF, with observed addresses corresponding to CDN edge infrastructure and no origin candidate exposed in this analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing and ordinary platform evaluation are proportionate to the assessed posture; before credentials, payments, or contractual commitments, ordinary independent checks of merchant identity, applicable terms, return or cancellation provisions, and payment protection should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100

Identity verification confidence	40%
----------------------------------	-----

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of prestashop.com.

- The request stayed on prestashop.com. It was not redirected to another domain. CLEAR
- Registration is published under SafeBrands SAS. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-11. NOTED
- The earliest public archive of this site is from 2007-10-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about prestashop.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
