

Is prestigeclient.st safe? TrustSniffer's low-trust assessment: 25/100

prestigeclient.st

Verdict

25

OUT OF 100

LOW TRUST

prestigeclient.st is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Site presents the Prestige Client, a free PvP mod for Minecraft (Fabric 26.2 and 1.21.11). Describes 47 modules across combat categories, provides download/install instructions and FAQs. No login or payment forms on the page; mentions a paid premium version available elsewhere. The page promotes cheating functionality (ESP, Silent Aim, Auto Crystal) which may be policy-violating or pose security risks through downloadable binaries.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://prestigeclient.st/>

What prestigeclient.st served when TrustSniffer captured it on 2026-09-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents Prestige Client, a free downloadable Minecraft PvP modification for Fabric 26.2 and 1.21.11, offering 47 combat-oriented modules such as ESP, Silent Aim, Auto Crystal, and WTap, with a paid premium version referenced elsewhere; its apparent business model is software distribution rather than financial services.

Scam/Impersonation Risk

The site presents a high-risk software-download proposition rather than a financial service, but the downloadable binary and advertised cheating capabilities create material security and policy risk. The homepage promotes functions including seeing players through walls, “undetected targeting,” automated crystal combat, and combo optimisation, while the stated provenance of the software and its operator is not

independently established. The principal contradiction is external: the domain has a confirmed blacklist signal, with multiple malicious detections and an additional suspicious detection from evaluated security services. No conflicting legal identities or explicit brand impersonation were identified in the supplied page evidence, but the blacklist finding is sufficient to create elevated risk for sensitive interaction.

EVIDENCE

- The homepage describes Prestige Client as a Fabric 26.2/1.21.11 modification with 47 modules across Crystal PvP, Sword PvP, and Mace PvP.
- The homepage specifically advertises ESP, Silent Aim, Auto Crystal, and WTap functionality and provides download and installation instructions.
- External reputation telemetry records 4 malicious detections, 1 suspicious detection, and a confirmed blacklist signal.
- The domain was registered on 2026-09-16 and is recorded as 0.01 years old.

Regulatory Verification Notes

The homepage does not identify a legal entity, licensing authority, registration number, or independently verifiable operator, leaving the site's legal status and accountability unclear. This is a transparency and verification gap rather than, by itself, proof of fraud; however, it is significant because the site distributes executable software and references a paid premium offering elsewhere. Available evidence supports only an unverified apparent operator identity. The site's transport security and hosting identity are technically identifiable, but those controls do not validate the operator or the software's safety.

EVIDENCE

- The homepage presents the product and download process without a stated legal entity, licensing disclosure, or registration number.
- Domain registration is recorded through ST Registry, with creation on 2026-09-16 and expiry on 2027-09-16.
- The site is served from AS214351, identified as FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.
- The transport certificate is issued by YR1 at DV validation level and is valid to 2026-12-15 18:33:26 UTC.

What to Verify Next

Before any sensitive interaction, an enterprise or individual should obtain the software only from an independently confirmed official channel, validate cryptographic hashes or publisher signatures against a trusted external source, and analyse the files in an isolated environment with current endpoint protection. The operator should also be independently identified, and any paid offering should be checked for a verifiable merchant identity, payment protections, refund terms, and support channels established outside the website.

EVIDENCE

- The homepage supplies download and installation instructions for executable modification software.
- The homepage states that the free version requires no account or subscription and references a paid premium version elsewhere.
- Page analysis found no login or payment forms and no untrusted form destination, but this does not establish the safety or provenance of the downloadable files.

Summary Verdict

The website has a low-trust posture with a confirmed external reputation contradiction and an unverified operating identity. Its apparently coherent product presentation and absence of on-page credential or payment forms do not offset the security implications of executable distribution or the external malicious-detection pattern. Sensitive interaction is not supported by the available evidence.

Infrastructure Integrity

Cloudflare CDN and WAF protection are present, and the observed address is an edge address rather than an independently exposed origin; this can reduce direct infrastructure exposure but cannot establish site legitimacy or software safety. The observed edge infrastructure is associated with AS214351 and FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.

Closing Assessment

The proportionate posture is passive review only, with no downloading, execution, credential submission, or payment activity until independent software provenance, operator identity, and file safety have been established.

Written analysis generated 2026-09-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of prestigeclient.st.

- The request stayed on prestigeclient.st. It was not redirected to another domain. CLEAR
- Registration is published under ST Registry. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-16. NOTED
- The earliest public archive of this site is from 2026-09-17. CLEAR
- It is hosted on FEMOIT, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about prestigeclient.st at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
