Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Prestigo.pl presents itself as a Polish local real-estate agency offering property sales and rentals, with listings organized by residential and commercial property type, published contact details, and a member-login function for agents or clients.

Scam/Impersonation Risk

The site's visible content is consistent with a small real-estate agency and contains no obvious investment, cryptocurrency, or brand-impersonation claims. However, this benign presentation is outweighed by confirmed external security contradictions: the domain is blacklisted, multiple security providers classify it as malicious, and the associated hosting IP has a severe abuse-report history. The abuse reporting is attributed to shared data-centre infrastructure rather than conclusively to the website operator, but the attribution remains material because the reports are not discounted. The site's real-world operator is also not independently verified. Accordingly, login, credential submission, and financially consequential interaction should be treated as unsafe.

EVIDENCE

- The homepage is identified as “Prestigo – Biuro nieruchomości” and contains a member-login form, while page analysis found no explicit phishing or brand-impersonation indicators.
- The domain is blacklisted by two external sources; security telemetry recorded 14 malicious detections, including detections from Fortinet, Kaspersky, and Sophos.
- Hosting-IP telemetry for 51.255.155.42 records 50 abuse reports from 35 distinct users, with a confidence score of 100; the reports are attributed to shared data-centre/web-hosting infrastructure.
- The domain was registered on 2007-08-27 and is approximately 19 years old.

Regulatory Verification Notes

The homepage supplies the Prestigo name, office address, telephone number, and email contacts, but the available site content does not disclose a licensing authority or license number. That is a regulatory-transparency gap requiring independent confirmation, not by itself proof of fraud. The available evidence does not independently connect the website to a verified legal entity, and the site’s governance and ownership disclosures are insufficient for regulated engagement. No matching signal was found in the reviewed broker-reputation context, but that absence does not establish authorization or legitimacy.

EVIDENCE

- The homepage identifies the business as Prestigo and provides an office address in Szczecin, Poland, a telephone number, and contact addresses.
- No license authority or license number is stated in the reviewed site content.
- The registered domain name is associated with the registrar Consulting Service Sp. z o.o.
- The site uses a valid DV TLS certificate issued by YR1, expiring 2026-11-20.

What to Verify Next

Before any sensitive interaction, an independent registry search should confirm the legal entity operating under the Prestigo name and establish whether real-estate activities require, or are covered by, a relevant Polish authorization. The stated office and telephone details should be validated through an offline or independently sourced channel rather than relying solely on the website. Credentials should not be reused on the member-login function, and any proposed payment, deposit, or transaction should remain suspended until the operator and contractual counterparty are independently confirmed.

EVIDENCE

- The homepage provides an office location and telephone contact that can be checked through an independent source.
- The member area exposes a username-and-password login, creating a credential-handling point that warrants separate validation.
- The reviewed content identifies a local agency business model but does not establish an independently verified legal counterparty.

Summary Verdict

The overall posture is **critical trust risk** with a high likelihood that sensitive interaction could expose the institution or user to material security and financial harm. The site’s conventional real-estate presentation and long domain tenure do not offset the confirmed external threat contradictions or the unresolved operator identity.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, which provides a mitigating control against direct exposure and rapid infrastructure changes but is not evidence of legitimacy. The observed edge infrastructure is hosted by OVH - OVH SAS in France on AS16276, and the origin server was not observable from the collected network view.

EVIDENCE

- Served from AS16276 (OVH - OVH SAS, FR), using edge IP 51.255.155.42.
- CDN/WAF protection was detected; one edge IP was observed and zero likely origin candidates were identified.
- TLS validation is DV; the certificate issuer is YR1 and validity extends to 2026-11-20.

Closing Assessment

Sensitive use should remain suspended unless independent legal-entity, regulatory, contact-channel, and transaction-counterparty checks produce satisfactory results; credentials, payments, and financial commitments should not be made through the site in the interim.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about prestigio.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
