Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is “El Diario de Misiones – Primera Edición,” a Spanish-language regional news publisher presenting local and national reporting across politics, economy, crime, sports, culture, events, obituaries, and classifieds. Its apparent business model is ad-supported digital publishing, supplemented potentially by audience measurement and reader-supported activity.

Scam/Impersonation Risk

No phishing, impersonation, malicious-activity, or conflicting legal-identity signals were observed. The site's content, stable browsing behavior, absence of login or sensitive-data forms, and conventional news-publishing model are consistent with an apparently legitimate low-risk media website rather than a credential-harvesting or transaction-abuse operation. The real-world operator remains independently unverified, so the evidence supports apparent legitimacy rather than proving the publisher's legal identity.

EVIDENCE

- The homepage identifies “El Diario de Misiones – Primera Edición” and provides substantive news coverage across local news, politics, economy, crime, sports, culture, events, obituaries, and classifieds.
- The domain was registered on 2024-10-15 and is approximately 1.82 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no malicious safe-browsing finding, and no reported abuse activity for the observed infrastructure.

Regulatory Verification Notes

The available material does not show a financial-service license or registration number, which is a transparency item relevant only if the site offers regulated services; the observed content instead describes a news publisher. The registration record names WIPPLINGER MARLENE ELIZABETH, but the available evidence does not independently connect that registrant to the publisher presented on the site. The cookie notice provides a meaningful privacy disclosure, stating that device and personal data may support analytics, personalized advertising, social-media integration, and sharing with up to 766 third parties.

EVIDENCE

- The homepage's cookie-consent notice states that data may be passed to up to 766 third parties for advertising, measurement, analytics, and related purposes.
- The site's hosting resolves to AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 with DV validation and is valid through 2026-11-03.
- The site appears within the established global web-traffic population, with a recorded traffic rank of 73280.

What to Verify Next

Before any credential or payment interaction, an independent check should confirm the publisher's legal identity and that the relevant privacy, subscription, donation, or payment terms correspond to the intended organization. Contact details should be validated through an independent route, and any payment should use a method offering appropriate dispute and transaction-protection controls.

EVIDENCE

- The homepage presented no login form, sensitive form, wallet interaction, or untrusted form destination during inspection.
- The site's stated operating model is content publishing supported by advertising and audience measurement rather than a financial or crypto service.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website. The classification supports normal browsing and ordinary site interaction, while the operator's real-world identity remains unverified.

Infrastructure Integrity

The website is protected by a Cloudflare CDN/WAF layer. All observed addresses were CDN edge servers, and no origin-server candidate was identified; this reduces direct origin exposure and is a mitigating infrastructure characteristic, not proof of legitimacy.

Closing Assessment

Normal use is proportionate to the assessed posture, with ordinary independent identity, privacy, and payment-protection checks retained before sensitive interactions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of primeraedicion.com.ar.

- The request stayed on primeraedicion.com.ar. It was not redirected to another domain. [CLEAR](#)
- Registration is published under nicar. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2026-10-15. [NOTED](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about primeraedicion.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
