

Is primesolutionsz.com legit? TrustSniffer's high-trust assessment: 100/100

primesolutionsz.com

Verdict

100

OUT OF 100

HIGH TRUST

primesolutionsz.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Vanguard Freight Systems presents B2B logistics services focused on cold-chain and temperature-controlled LTL, offering telematics integration, dedicated carriage, expedited freight, and API/EDI hooks. Contact and quote form plus physical headquarters and phone/email provided.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents Vanguard Freight Systems as a corporate B2B logistics provider focused on temperature-controlled LTL freight, dedicated carriage, expedited shipments, and supply-chain technology integration, with the apparent business model of securing transportation contracts and quote-based service agreements.

Scam/Impersonation Risk

No contradictions were observed: there are no reported phishing, impersonation, blacklist, or malicious-content indicators. The homepage does make substantial commercial claims, including service to "500+ supply chain directors nationwide," operations "since 2008," and displayed performance counters for on-time delivery and annual loads; these claims are not independently established by the supplied evidence, but their presence is not itself evidence of impersonation. The contact and quote workflow does not request passwords or other sensitive credentials, and observed browser behavior showed no hidden forms, external posting, wallet activity, cloaking, or suspicious scripts.

EVIDENCE

- The homepage identifies Vanguard Freight Systems and describes cold-chain logistics, reefer telematics, LoadMaster dispatch integration, and a three-step temperature-control protocol.
- The homepage contains one contact/quote form with no sensitive form fields and no untrusted submission destination.
- Evaluated external reputation findings recorded zero malicious detections, zero suspicious detections, no blacklist hit, and zero abuse reports.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate commercial website, but the real-world operator identity is not independently verified. The site supplies a corporate headquarters location and direct telephone and email contact details, while the supplied page evidence does not show a license or registration number; for a freight-services counterparty, that is a transparency and verification gap rather than evidence of a scam. The site's "since 2008" statement should therefore be treated as an on-site business-history claim rather than independent proof of incorporation or operating authority. No broker-dataset match was identified, which is contextual reputational information only and is not a licensing determination.

EVIDENCE

- The domain was registered on 2022-09-20 and is 3.92 years old.
- The site is served from AS16276, operated by OVH - OVH SAS, FR.
- Its TLS certificate uses DV validation, is issued by YR2, and is valid to 2026-10-10T03:19:42+00:00.
- The homepage provides a headquarters location and direct contact channels, while the supplied site evidence contains no stated license or registration number.

What to Verify Next

Before a commercial engagement, the counterparty's legal name should be matched to an independently obtained corporate or transport-regulatory record, and the relevant authority should confirm any permits or operating registrations applicable to the proposed services. Contracting parties should also validate the headquarters and contact channels through an independently sourced route, review service-level, liability, claims, and cancellation terms, and confirm payment protections before funds or sensitive business information are exchanged.

EVIDENCE

- The site's identity and legal disclosures should be checked against an independent corporate or transport-regulatory registry.
- The published headquarters and contact channels provide points for independent counterparty validation.
- The quote-request process should be followed by review of the resulting written commercial terms before commitment.

Summary Verdict

The overall posture is **high trust and low risk**, with strong convergence across substantive corporate content, benign observed behavior, clean available reputation signals, established registration continuity, and sound transport security. The website appears legitimate for ordinary business evaluation, while the absence of independently verified operator identity means that apparent legitimacy should not be treated as proof of the real-world counterparty.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, with observed edge infrastructure and a potential origin candidate. This reduces direct exposure of the service environment and is a useful mitigating control, but protective hosting infrastructure alone does not establish the operator's identity or business authority.

Closing Assessment

Ordinary browsing and initial business correspondence are proportionate, but credentials, sensitive corporate information, or payments should follow independent counterparty, contractual, and payment-protection checks.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of primesolutionsz.com.

- The request stayed on primesolutionsz.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by primesolutionsz.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-20. NOTED
- The earliest public archive of this site is from 2023-01-26. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about primesolutionsz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
