

Is printlogz.com a scam? TrustSniffer's high-risk assessment: 0/100

printlogz.com

Verdict

0

OUT OF 100

CRITICAL RISK

printlogz.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate site for Printlogz, a print audit and user management product. Provides feature descriptions, contact details, supported brands, client list, and purchase/quote call-to-action.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	11 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0% confidence AbuseIPDB, 3 reports; shared hosting inflates reports	CLEAR
Domain age	17 years old Registered history	CLEAR
Web archive	Archived since 2010 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

https://printlogz.com/

What printlogz.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Printlogz is a corporate product website for Avenir's Printlogz print-audit and user-management software. It presents printing-cost monitoring, real-time print-activity tracking, print quotas, chargeback, enterprise cost measurement, supported printer brands, product versions, and purchase or quotation pathways, indicating a commercial enterprise-software business model.

Scam/Impersonation Risk

The site content does not itself show an apparent brand-impersonation scheme, phishing form, wallet connection, or malicious browser behavior. However, the domain is subject to a **confirmed blacklist hit** and multiple external threat detections, including detections classified as malicious and suspicious; this is a material contradiction that overrides the otherwise ordinary software-business presentation. Reports associated with the hosting IP are attributed to shared data-centre infrastructure and are therefore not treated as direct proof that the site itself caused those reports, but they do not offset the separate domain-level detections. Sensitive

interaction, software acquisition, credential submission, or financial engagement should not proceed on the basis of the website's content alone.

EVIDENCE

- External security assessment recorded 11 malicious and 3 suspicious detections for the domain; Fortinet and Sophos were among the vendors reporting a threat.
- A confirmed blacklist status was recorded, while Google Safe Browsing reported no malicious result.
- The hosting IP 78.159.97.108 had 3 abuse reports attributed to shared infrastructure operated by Leaseweb Deutschland GmbH.
- Domain registration telemetry records creation on 2009-05-23T04:31:07Z, with an age of 17.25 years; archive records span 2010-04-25T00:42:43Z through 2026-01-20T20:26:37Z, covering 17 years.

Regulatory Verification Notes

The website presents a software product rather than a clearly regulated financial service, but the available business and contact content does not provide a regulatory license or registration number. This is a verification gap rather than, by itself, evidence of fraud. Independent connection of the website to a real-world operating entity remains unverified. The domain uses a valid domain-validated TLS certificate, but transport encryption confirms only the connection security and not the legitimacy of the operator or the safety of the software.

EVIDENCE

- The available product, about, and contact content does not state a regulatory license, registration number, or licensing authority.
- The domain registrar is PDR Ltd. d/b/a PublicDomainRegistry.com.
- TLS is issued by YR1 at DV validation level and is valid through 2026-11-04T01:32:40+00:00.

What to Verify Next

Before any sensitive engagement, an enterprise should independently confirm the operator's legal identity, ownership of the Printlogz product, and any applicable software-sales or data-processing obligations through authoritative corporate and regulatory records. Any installer, update, or support-provided file should undergo independent malware scanning and controlled sandbox testing, and official contact channels should be confirmed through an offline or independently sourced route. Credentials, privileged access, payment details, and production deployment should remain withheld unless those checks produce satisfactory results.

EVIDENCE

- Browser testing observed no login form, hidden form, password submission, wallet connection, or clipboard-hijacking behavior.
- The observed page made no external XHR or fetch requests and showed no suspicious inline scripts during the recorded runs.
- The site returned successfully in both recorded browser runs, but stable delivery does not resolve the external threat detections.

Summary Verdict

The website carries a critical trust posture with a material sensitive-interaction risk. Its conventional software presentation is insufficient to overcome the confirmed external reputation contradiction, and the operating identity is not independently verified.

Infrastructure Integrity

The site resolves directly to one likely origin IP rather than a detected CDN edge, with hosting on AS28753, Leaseweb Deutschland GmbH, in Germany. No CDN or WAF vendor was detected; this infrastructure is identifiable and stable, but it provides no basis for treating the site as legitimate and cannot mitigate the domain-level threat findings.

Closing Assessment

The appropriate enterprise disposition is to suspend sensitive interaction and production deployment pending independent operator verification and security validation of any supplied software or files.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 78.159.97.108 (Leaseweb Deutschland GmbH, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of printlogz.com.

- The request stayed on printlogz.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by hostingnox.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-23. NOTED
- The earliest public archive of this site is from 2010-04-25. CLEAR
- It is hosted on LEASEWEB-DE-FRA-10, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about printlogz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
